## CAMBRIDGE LIBRARY COLLECTION

*Books of enduring scholarly value*

### Travel and Exploration

The history of travel writing dates back to the Bible, Caesar, the Vikings and the Crusaders, and its many themes include war, trade, science and recreation. Explorers from Columbus to Cook charted lands not previously visited by Western travellers, and were followed by merchants, missionaries, and colonists, who wrote accounts of their experiences. The development of steam power in the nineteenth century provided opportunities for increasing numbers of 'ordinary' people to travel further, more economically, and more safely, and resulted in great enthusiasm for travel writing among the reading public. Works included in this series range from first-hand descriptions of previously unrecorded places, to literary accounts of the strange habits of foreigners, to examples of the burgeoning numbers of guidebooks produced to satisfy the needs of a new kind of traveller - the tourist.

### A Voyage to Terra Australis

In the early nineteenth century, Australia remained largely uncharted, and doubt prevailed as to its unity as a continent. The 1801 expedition led by English mariner and cartographer Matthew Flinders (1774–1814), was groundbreaking in this respect. Flinders' charting of the Australian coastline provided the first complete map outlining the continent, and his influence was decisive in changing its name from *Terra Australis* to Australia – a term 'more agreeable to the ear'. Structured around daily geographical and astronomical observations, Flinders' journals – published in 1814, the day before his death – are remarkable for their humanity and sense of humour. Started in 1801, they continue to include Flinders' imprisonment by the French in the island of Mauritius between 1803 and 1810. The second volume tells of the discoveries made along the East and North coasts of the continent, and includes an account of Flinders' captivity. An appendix details botanical discoveries.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
