CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Women's Writing

The later twentieth century saw a huge wave of academic interest in women's writing, which led to the rediscovery of neglected works from a wide range of genres, periods and languages. Many books that were immensely popular and influential in their own day are now studied again, both for their own sake and for what they reveal about the social, political and cultural conditions of their time. A pioneering resource in this area is Orlando: Women's Writing in the British Isles from the Beginnings to the Present (<http://orlando.cambridge.org>), which provides entries on authors' lives and writing careers, contextual material, timelines, sets of internal links, and bibliographies. Its editors have made a major contribution to the selection of the works reissued in this series within the Cambridge Library Collection, which focuses on non-fiction publications by women on a wide range of subjects from astronomy to biography, music to political economy, and education to prison reform.

Guide to Windermere

Described by George Eliot as 'the only English woman that possesses thoroughly the art of writing', Harriet Martineau held a prominent position in the intellectual life of Victorian culture. This 1854 guide to Windermere was the first in her series of guides to the Lake District, leading eventually to her hugely successful *Complete Guide to the English Lakes*. In this *Guide*, Martineau engages with the emerging industry of literary tourism, and describes why the thriving village of Windermere warranted a 'new guide book'. She appreciatively details the natural features of the district and its architecture, and presents accounts of scenic walks and day tours to the neighbouring lakes, combining practical information with literary passages of description. An outstanding woman of her time, Martineau followed in Wordsworth's footsteps through imaginative empathy with the local landscape of the Lake District, continuing its rich literary associations. For more information on this author, see http://orlando.cambridge.org/public/svPeople?person_id=martha

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
