CONTENTS

OF

THE FIRST VOLUME.

	Page
INTRODUCTION	3

BOOK I.

HISTORY OF THE GREEK SCHOOL PHILOSOPHY, WITH
REFERENCE TO PHYSICAL SCIENCE.

CHAPTER I.—PRELUDE TO THE GREEK SCHOOL PHILOSOPHY.

<i>Sect.</i> 1. First Attempts of the Speculative Faculty in Physical Inquiries	23
<i>Sect.</i> 2. Primitive Mistake in Greek Physical Philosophy .	32

CHAPTER II.—THE GREEK SCHOOL PHILOSOPHY.

<i>Sect.</i> 1. The general Foundation of the Greek School Philosophy	37
<i>Sect.</i> 2. The Aristotelian Physical Philosophy	41
<i>Sect.</i> 3. Technical Forms of the Greek Schools	55
1. ————— of the Aristotelian Philosophy	55
2. ————— of the Platonists	59
3. ————— of the Pythagoreans	62
4. ————— of the Atomists and others	63

CHAPTER III.—FAILURE OF THE GREEK SCHOOL PHILOSOPHY.

<i>Sect.</i> 1. Result of the Greek School Philosophy	67
<i>Sect.</i> 2. Cause of the Failure of the Greek Physical Philosophy	72

Cambridge University Press

xviii CONTENTS OF THE FIRST VOLUME.

BOOK II.

HISTORY OF THE PHYSICAL SCIENCES IN ANCIENT GREECE.

	Page
Introduction	89
CHAPTER I.—EARLIEST STAGES OF MECHANICS AND HYDROSTATICS.	
<i>Sect. 1.</i> Mechanics	91
<i>Sect. 2.</i> Hydrostatics	95
CHAPTER II.—EARLIEST STAGES OF OPTICS.	98
CHAPTER III.—EARLIEST STAGES OF HARMONICS.	102

BOOK III.

HISTORY OF GREEK ASTRONOMY.

Introduction	109
CHAPTER I.—EARLIEST STAGES OF ASTRONOMY.	
<i>Sect. 1.</i> Formation of the Notion of a Year	111
<i>Sect. 2.</i> Fixation of the Civil Year	114
<i>Sect. 3.</i> Correction of the Civil Year. (Julian Calendar)	120
<i>Sect. 4.</i> Attempts at the Fixation of the Month	123
<i>Sect. 5.</i> Invention of Lunisolar Years	126
<i>Sect. 6.</i> The Constellations	132
<i>Sect. 7.</i> The Planets	137
<i>Sect. 8.</i> The Circles of the Sphere	140
<i>Sect. 9.</i> The Globular Form of the Earth	147
<i>Sect. 10.</i> The Phases of the Moon	150
<i>Sect. 11.</i> Eclipses	151
<i>Sect. 12.</i> Sequel to the Early Stages of Astronomy	154
CHAPTER II.—PRELUDE TO THE INDUCTIVE EPOCH OF HIPPARCHUS.	
	157
CHAPTER III.—INDUCTIVE EPOCH OF HIPPARCHUS.	
<i>Sect. 1.</i> Establishment of the Theory of Epicycles and Eccentrics	169

Cambridge University Press

978-1-108-01924-8 - History of the Inductive Sciences: From the Earliest to the Present Times, Volume 1

William Whewell

Table of Contents

[More information](#)CONTENTS OF THE FIRST VOLUME. xi

	Page
<i>Sect. 2.</i> Estimate of the Value of the Theory of Eccentrics and Epicycles	179
<i>Sect. 3.</i> Discovery of the Precession of the Equinoxes	186

CHAPTER IV.—SEQUEL TO THE INDUCTIVE EPOCH OF
HIPPARCHUS.

<i>Sect. 1.</i> Researches which verified the Theory	190
<i>Sect. 2.</i> Researches which did not verify the Theory	194
<i>Sect. 3.</i> Methods of Observation of the Greek Astronomers	197
<i>Sect. 4.</i> Period from Hipparchus to Ptolemy	205
<i>Sect. 5.</i> Measures of the Earth	211
<i>Sect. 6.</i> Ptolemy's Discovery of Evection	213
<i>Sect. 7.</i> Conclusion of the History of Greek Astronomy	220
<i>Sect. 8.</i> Arabian Astronomy	222

BOOK IV.

HISTORY OF PHYSICAL SCIENCE IN THE
MIDDLE AGES.

Introduction	235
------------------------	-----

CHAPTER I.—ON THE INDISTINCTNESS OF IDEAS OF THE
MIDDLE AGES. 237

1. Collections of Opinions	239
2. Indistinctness of Ideas in Mechanics	241
3. ————— shown in Architecture	246
4. ————— in Astronomy	248
5. ————— shown by Sceptics	249
6. Neglect of Physical Reasoning in Christendom	252
7. Question of Antipodes	253
8. Intellectual Condition of the Religious Orders	257
9. Popular Opinions	260

CHAPTER II.—THE COMMENTATORIAL SPIRIT OF THE
MIDDLE AGES. 264

1. Natural Bias to Authority	266
2. Character of Commentators	268
3. Greek Commentators on Aristotle	271

Cambridge University Press

978-1-108-01924-8 - History of the Inductive Sciences: From the Earliest to the Present Times, Volume 1

William Whewell

Table of Contents

[More information](#)

XX CONTENTS OF THE FIRST VOLUME.

	Page
4. Greek Commentators on Plato and others	275
5. Arabian Commentators on Aristotle	276

CHAPTER III.—OF THE MYSTICISM OF THE MIDDLE

	AGES.	Page
1. Neoplatonic Theosophy		283
2. Mystical Arithmetic		289
3. Astrology		293
4. Alchemy		303
5. Magic		306

CHAPTER IV.—OF THE DOGMATISM OF THE MIDDLE

	AGES.	Page
1. Origin of the Scholastic Philosophy		311
2. Scholastic Dogmas		316
3. Scholastic Physics		324
4. Authority of Aristotle among the Schoolmen		325
5. Subjects omitted. Civil Law. Medicine		329

CHAPTER V.—PROGRESS OF THE ARTS IN THE MIDDLE

	AGES.	Page
1. Art and Science		331
2. Arabian Science		336
3. Experimental Philosophy of the Arabians		338
4. Roger Bacon		341
5. Architecture of the Middle Ages		343
6. Treatises on Architecture		347

BOOK V.

HISTORY OF FORMAL ASTRONOMY AFTER THE
STATIONARY PERIOD.

Introduction	355
------------------------	-----

CHAPTER I.—PRELUDE TO THE INDUCTIVE EPOCH OF COPERNICUS.	359
---	-----

CHAPTER II.—INDUCTION OF COPERNICUS. THE HELIO- CENTRIC THEORY ASSERTED ON FORMAL GROUNDS.	368
---	-----

Cambridge University Press

978-1-108-01924-8 - History of the Inductive Sciences: From the Earliest to the Present Times, Volume 1

William Whewell

Table of Contents

[More information](#)CONTENTS OF THE FIRST VOLUME. xxi

	Page
CHAPTER III.—SEQUEL TO COPERNICUS. THE RECEPTION AND DEVELOPEMENT OF THE COPERNICAN THEORY.	
<i>Sect. 1.</i> First Reception of the Copernican Theory . . .	381
<i>Sect. 2.</i> Diffusion of the Copernican Theory . . .	384
<i>Sect. 3.</i> The Heliocentric Theory confirmed by Facts. Galileo's Astronomical Discoveries . . .	392
<i>Sect. 4.</i> The Copernican System opposed on Theological Grounds	397
<i>Sect. 5.</i> The Heliocentric Theory confirmed on Physical Considerations. (Prelude to Kepler's Astro- nomical Discoveries.)	404
CHAPTER IV.—INDUCTIVE EPOCH OF KEPLER.	
<i>Sect. 1.</i> Intellectual Character of Kepler	410
<i>Sect. 2.</i> Kepler's Discovery of his Third Law	415
<i>Sect. 3.</i> Kepler's Discovery of his First and Second Laws. Elliptical Theory of the Planets	421
CHAPTER V.—SEQUEL TO THE EPOCH OF KEPLER. RECEPTION, VERIFICATION, AND EXTENSION OF THE ELLIPTICAL THEORY.	
<i>Sect. 1.</i> Application of the Elliptical Theory to the Planets	430
<i>Sect. 2.</i> Application of the Elliptical Theory to the Moon	432
<i>Sect. 3.</i> Causes of further Progress of Astronomy	435
