CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

History

The books reissued in this series include accounts of historical events and movements by eye-witnesses and contemporaries, as well as landmark studies that assembled significant source materials or developed new historiographical methods. The series includes work in social, political and military history on a wide range of periods and regions, giving modern scholars ready access to influential publications of the past.

A History of Cyprus

Sir George Francis Hill (1867–1948), was perhaps best known as a numismatist, although his scholarly interests and accomplishments included a range of time periods and subjects. A classicist by training, Hill built his career at the British Museum's department of coins and medals. In his forty-three years there he produced volumes on coins of antiquity; Greek history and art; coins, heraldry, and iconography of medieval and Renaissance Italy; and treasure troves. In 1931 Hill became the Museum's director and principal librarian, the first archaeologist to hold this post. His four-volume *History of Cyprus* (1940–52) ranged from Cyprus's earliest years to the twentieth century, and became the standard text on the subject. It is a valuable resource for scholars of the country, of antiquity and of the Mediterranean world. Volume 3, organised largely around monarchical reigns, concludes Hill's analysis of the Frankish period (1432–1571).

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
