CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

History

The books reissued in this series include accounts of historical events and movements by eye-witnesses and contemporaries, as well as landmark studies that assembled significant source materials or developed new historiographical methods. The series includes work in social, political and military history on a wide range of periods and regions, giving modern scholars ready access to influential publications of the past.

A History of England

German historian Leopold Von Ranke (1795-1886) is well known for pioneering the modern historical method which advocates empiricism, rather than a focus on the philosophy of history. Emphasizing the importance of presenting history exactly as it happened, Ranke asserted that different eras need to be understood in their own contexts rather than in relation to each other: history should not be regarded as one long, teleological narrative. These principles of writing history, established in earlier publications, are all evident here. Originally published in eight volumes between 1859 and 1869, Ranke's history, 'principally in the seventeenth century', was first published as a six-volume history in English by the Clarendon Press in 1875, the mammoth task of its translation distributed among eight Oxford dons. Volume 4 covers the last years of Charles II, the establishment of the Whig and Tory parties, and the Glorious Revolution of 1688.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
