CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

History

The books reissued in this series include accounts of historical events and movements by eye-witnesses and contemporaries, as well as landmark studies that assembled significant source materials or developed new historiographical methods. The series includes work in social, political and military history on a wide range of periods and regions, giving modern scholars ready access to influential publications of the past.

The Life and Services of Horatio Viscount Nelson

Horatio Nelson, 1st Viscount Nelson (1758–1805) is considered one of the greatest naval commanders in British history, having establishing Britain's naval dominance with victories during the French Revolutionary and Napoleonic Wars. His death at the height of the Battle of Trafalgar ensured that his memory became revered. These volumes, first published in 1809 (and reissued here from the 1840 edition), contain Nelson's official biography, published with the blessing of his family. The authors Clarke and McArthur trace Nelson's life from his childhood until his dramatic death at Trafalgar, using Nelson's own reminiscences, his letters to his wife, and interviews and statements from close friends and colleagues. This biography remains a valuable source for Nelson's early career and character, and provides insights into how the cult of Nelson was created and sustained. Volume 3 covers the final years of Nelson's life, and the circumstances of his death.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
