## CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

### History

The books reissued in this series include accounts of historical events and movements by eye-witnesses and contemporaries, as well as landmark studies that assembled significant source materials or developed new historiographical methods. The series includes work in social, political and military history on a wide range of periods and regions, giving modern scholars ready access to influential publications of the past.

### The Naval Chronology of Great Britain

James Ralfe (*fl.* 1820–9) was a historian best remembered for this comprehensive history of British naval involvement in the Napoleonic Wars. First published in 1820 and intended as a successor and continuation of Captain Isaac Schomberg's history of the navy, *Naval Chronology*, Ralfe's work is remarkably detailed, using first-hand accounts of naval engagements taken from interviews with officers and sailors in addition to contemporary official naval documents. Chronologically by year, Ralfe notes and explains major parliamentary proceedings relating to the navy, lists the serving flag officers for the given year, and describes naval battles and engagements, arranged according to location. The innovative structure of these volumes, with detailed descriptions of naval battles, provide a valuable reference for the study of the British navy during the Napoleonic Wars. Volume 2 covers 1807–9.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
