CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Religion

For centuries, scripture and theology were the focus of prodigious amounts of scholarship and publishing, dominated in the English-speaking world by the work of Protestant Christians. Enlightenment philosophy and science, anthropology, ethnology and the colonial experience all brought new perspectives, lively debates and heated controversies to the study of religion and its role in the world, many of which continue to this day. This series explores the editing and interpretation of religious texts, the history of religious ideas and institutions, and not least the encounter between religion and science.

Journal of Various Visits to the Kingdoms of Ashanti, Aku, and Dahomi, in Western Africa

Methodist missionary Thomas Birch Freeman (1809–90) was one of the most successful missionaries of his day, founding churches in Nigeria and the Gold Coast. The son of an African father and English mother, he possessed great diplomatic skills in dealing with colonial administrators and native rulers, and Methodist churches spread rapidly using literate converts as lay preachers, particularly among freed and repatriated slaves. His resignation was caused by financial problems due to poor accounting. His *Journal* was serialised in a Methodist periodical between 1840 and 1843, published as a book in 1843, and revised the following year. His attempts to get the slave trade and the practice of human sacrifice abolished in Dahomey were frustrated, but he was much more successful in founding missions. The book is a fascinating picture of life in West Africa in the mid nineteenth century.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
