CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

History

The books reissued in this series include accounts of historical events and movements by eye-witnesses and contemporaries, as well as landmark studies that assembled significant source materials or developed new historiographical methods. The series includes work in social, political and military history on a wide range of periods and regions, giving modern scholars ready access to influential publications of the past.

England in the Seven Years' War

Sir Julian Corbett (1854–1922) was an eminent British naval historian who focused on the analysis of historic naval strategy. After graduating from Trinity College, Cambridge, in 1876 Corbett practised as a barrister until 1882, when he turned to historical writing. He was appointed Lecturer in History to the Royal Naval College, Greenwich, in 1903, and was consulted on naval reforms during the First World War. These volumes, first published in 1907, contain Corbett's detailed analysis of naval warfare during the Seven Years' War (1756–63). Focusing on the strategy of the British navy, Corbett recounts chronologically the major actions of the war, analysing in detail fleet movements and naval tactics in their political and diplomatic context. These volumes were the first scholarly work on this subject, and provide valuable information concerning the development of English naval strategy during this formative period. Volume 2 covers 1759–63.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
