CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Literary studies

This series provides a high-quality selection of early printings of literary works, textual editions, anthologies and literary criticism which are of lasting scholarly interest. Ranging from Old English to Shakespeare to early twentieth-century work from around the world, these books offer a valuable resource for scholars in reception history, textual editing, and literary studies.

Mary Howitt

Mary Howitt (1799-1888) was one of the most prolific female writers and translators of her day, producing over a hundred titles in her lifetime. Held in high regard by her contemporaries, Howitt was best known for her Scandinavian interests, particularly for her translations of Frederika Bremer and Hans Christian Andersen. She also published numerous collections of poetry and stories, sometimes in partnership with her husband, the writer William Howitt. This autobiography was published posthumously in 1889 in two volumes, and was completed and edited by her daughter Margaret. Volume 1 covers the first forty-four years of Howitt's life: a Quaker childhood, marriage to William Howitt, the birth of their children, and family life in Nottingham, Esher, and Heidelberg. It also includes several illustrations of family members and various residences. For more information on this author, see http://orlando.cambridge.org/public/svPeople?person_id=howima

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
