CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

History

The books reissued in this series include accounts of historical events and movements by eye-witnesses and contemporaries, as well as landmark studies that assembled significant source materials or developed new historiographical methods. The series includes work in social, political and military history on a wide range of periods and regions, giving modern scholars ready access to influential publications of the past.

The State of the Poor

Sir Frederick Morton Eden (1766–1809) was an English writer and a pioneer social researcher. Eden studied at Christ Church, Oxford, and subsequently worked in banking and insurance, inheriting a baronetcy from his father, who had been the governor of the American province of Maryland, in 1784. Arguing that poverty could not be tackled without knowing what it actually meant to be poor, this innovative three-volume work is an attempt to define what poverty meant in concrete terms. It is packed with data from across England, divided by county, and covering factors such as food prices, wages, diet and mortality rates. Volume 3 presents the second set of reports on living conditions of the poor in the various English counties, sorted alphabetically from Surrey to Yorkshire, and the Welsh counties. A study of Scotland's poor is included in an appendix.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
