CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Religion

For centuries, scripture and theology were the focus of prodigious amounts of scholarship and publishing, dominated in the English-speaking world by the work of Protestant Christians. Enlightenment philosophy and science, anthropology, ethnology and the colonial experience all brought new perspectives, lively debates and heated controversies to the study of religion and its role in the world, many of which continue to this day. This series explores the editing and interpretation of religious texts, the history of religious ideas and institutions, and not least the encounter between religion and science.

Memoir of the Life and Episcopate of George Augustus Selwyn, D.D.

This two-volume biography of George Augustus Selwyn (1809–78), the first Anglican bishop of New Zealand, after whom Selwyn College, Cambridge, was later named, was published in 1879. Selwyn was ordained in 1834 and served as curate at Windsor; in 1840, when New Zealand was declared an independent British colony, he was chosen as first bishop of the newly established diocese. The declared aim was to develop an Anglican organisation for the growing European settlement, while resisting too much state control, and by 1857 Selwyn had drafted a constitution for the Church of New Zealand which led eventually to disestablishment. A staunch defender of indigenous rights, he travelled widely throughout New Zealand and the Pacific islands, and subsequently played a leading role in the first Lambeth Conference. In Volume 2, H. W. Tucker describes Selwyn's later ministry, the effect of the Maori Wars, and his final years as bishop of Lichfield.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
