CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Travel and Exploration

The history of travel writing dates back to the Bible, Caesar, the Vikings and the Crusaders, and its many themes include war, trade, science and recreation. Explorers from Columbus to Cook charted lands not previously visited by Western travellers, and were followed by merchants, missionaries, and colonists, who wrote accounts of their experiences. The development of steam power in the nineteenth century provided opportunities for increasing numbers of 'ordinary' people to travel further, more economically, and more safely, and resulted in great enthusiasm for travel writing among the reading public. Works included in this series range from first-hand descriptions of previously unrecorded places, to literary accounts of the strange habits of foreigners, to examples of the burgeoning numbers of guidebooks produced to satisfy the needs of a new kind of traveller - the tourist.

Journal d'Antoine Galland Pendant son Séjour à Constantinople, 1672-1673

The French orientalist Antoine Galland (1646–1715) held the chair of Arabic at the Collège de France from 1709 until his death. He was the first European translator of *The Thousand and One Nights*, which he published between 1704 and 1717. A hugely influential work, it provided the basis for later translations in English and German. Between 1670 and 1675, Galland worked as a librarian and private secretary to the marquis de Nointel, who had been appointed as the French ambassador in Istanbul. This book, first published in 1881, is the record of Galland's daily life at the embassy. It is a personal diary covering the period 1672–3 that includes details of Galland's research and of the manuscripts he purchased on behalf of the ambassador. An introduction by Charles Schefer (1820–98) provides details of the political and diplomatic relations between France and Turkey at the time.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
