CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

History

The books reissued in this series include accounts of historical events and movements by eye-witnesses and contemporaries, as well as landmark studies that assembled significant source materials or developed new historiographical methods. The series includes work in social, political and military history on a wide range of periods and regions, giving modern scholars ready access to influential publications of the past.

History of the Expedition to Russia, Undertaken by the Emperor Napoleon, in the Year 1812

The French general and historian Philippe-Paul, Comte de Ségur (1780–1873) served as a member of Napoleon's personal staff during the Russian campaign. He had joined the cavalry in 1800 and had distinguished himself during earlier episodes of the European war; this led to him being chosen for several diplomatic missions. His two-volume account of the invasion of Russia, first published in French in 1824, has been through many editions and has been translated into many languages. It is both a military history and an eyewitness account. This English translation was first published in 1825 and remains immensely valuable to historians' understanding of Napoleon's ultimately disastrous Russian strategy. Volume 2 begins with Napoleon's arrival in Moscow on 14 September 1812. The remainder of the book charts the events of the army's retreat, details the conditions endured and the lives lost in the course of it.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
