CONTENTS

INTRODUCTION.

CHAP.		PAGE
	THE UNITS OF VEGETATION—THEIR RELATIONSHIPS AND CLASSIFICATION	1
	The Plant-formation	4
	Sub-formations	10
	The Plant-association	10
	Sub-associations and "facies"	11
	The Plant-society	12

PART I. THE CONDITIONS OF VEGETATION
IN THE BRITISH ISLES.

I.	THE PHYSICAL CHARACTERS AND CLIMATE OF THE BRITISH ISLANDS	15
II.	THE SOILS OF THE BRITISH ISLANDS	32
	The Soils of Scotland, by W. G. Smith	38
	The Soils of Ireland, by Grenville A. J. Cole	44
	The Soils of England and Wales	47

PART II. THE EXISTING VEGETATION OF THE
BRITISH ISLES.

I.	THE DISTRIBUTION OF THE CHIEF FORMS OF VEGETATION	62
II.	THE PLANT-FORMATION OF CLAYS AND LOAMS	75
	Pedunculate oakwood association (<i>Quercetum Roburis</i>)	76
	Scrub association	83
	Neutral grassland association	84
	<i>Juncetum communis</i>	86

CHAP.		PAGE
III.	THE VEGETATION OF THE COARSER SANDS AND SANDSTONES	88
	The Plant-formation of Sandy Soil	92
	Dry Oakwood association	92
	Scrub association	94
	Grass heath association	94
	East Anglian heaths	97
IV.	THE HEATH FORMATION	98
	Oak-birch heath association	100
	Heath association	103
	Regions of English heathland	107
	Scottish Heaths, by W. G. Smith	113
	Pinewood association	116
V.	THE PLANT-FORMATION OF THE OLDER SILICEOUS SOILS	122
	A. The Pennine Region, by C. E. Moss	122
	Association of the Sessile Oak (<i>Quercetum sessilifloræ</i>)	123
	Sub-associations of the ground vegetation	127
	Scrub associations	130
	Siliceous grassland associations	131
	<i>Nardetum strictæ</i>	132
	<i>Molinietum cæruleæ</i>	135
	B. Other regions	137
	Birchwood association (<i>Betuletum tomentosæ</i>)	141
VI.	THE VEGETATION OF CALCAREOUS SOILS	144
	The Plant-formation of Calcareous Soils	145
	A. The sub-formation of the Older Limestones, by C. E. Moss	146
	Ashwood association	147
	Sub-associations of the ground vegetation	150
	Limestone scrub association	153
	Limestone grassland association	154
	Limestone heath	158
	Limestone pavement association	160
	B. The sub-formation of the Chalk, by A. G. Tansley and W. M. Rankin	161
	Beechwood association of the Chalk	163
	Ashwood association	166
	Competition between beech and ash	167
	Yew-woods	169
	Chalk scrub association	171
	Chalk grassland association	173
	Chalk heath	175
	Vegetation of Fleam Dyke	178

CHAP.	PAGE
VI. <i>cont.</i> C. The sub-formation of Marls and Calcareous sand-	
stones	181
Ash-oakwood association	181
Scrub and grassland associations	186
VII. AQUATIC VEGETATION	187
The Freshwater aquatic formation	188
A. The sub-formation of foul waters	188
B. The sub-formation of waters rich in mineral salts	190
C. The sub-formation of waters poor in mineral salts	192
D. The sub-formation of quickly-flowing streams	194
The British Freshwater Phyto-plankton, by Prof. G. S. West	196
VIII. THE MARSH FORMATION	204
Alder-willow association	205
Herbaceous marsh association	207
IX. THE VEGETATION OF PEAT AND PEATY SOILS—MOOR, FEN AND HEATH	208
X. THE RIVER VALLEYS OF EAST NORFOLK: THEIR AQUATIC AND FEN FORMATIONS, BY MARIETTA PALLIS	214
The River Valleys	216
Origin of the Broads	219
The Aquatic formation	223
The Fen formation	229
Fen association	230
Sphagneta	234
Carr association	236
Other associations	242
Genetic relations of associations	245
XI. THE MOOR FORMATION—LOWLAND MOORS	246
The Transition from Fen to Moor	246
The Lowland Moors ("Mosses") of Lonsdale (North Lancashire) and their Development from Fens, by W. Munn Rankin	247
1. Estuarine Moors	248
The present vegetation	248
Stratification of the Peat	252
2. Lacustrine Moors	256
Stratification of the Peat	256
The Valley Moors of the New Forest, by W. Munn Rankin	259
The Lowland Moors of Connemara (West Ireland)	264

CHAP.		PAGE
XII.	THE UPLAND MOORS OF THE PENNINE CHAIN, BY F. J. LEWIS AND C. E. MOSS	266
	1. Bog-moss association (<i>Sphagnetum</i>)	267
	2. Cotton-grass associations (<i>Eriophoretum</i>)	267
	3. Association of <i>Scirpus caespitosus</i> (<i>Scirpetum</i>)	271
	4. Bilberry moor associations (<i>Vaccinieta</i>)	272
	5. Heather moor association (<i>Callunetum</i>)	275
	Rush society	278
	Society of stagnant hollows	279
	Zonation of the moor associations	279
	Degeneration (Retrogression) of Moorland	280
	Grass moor association, by W. G. Smith	282
	Summary of moor associations	286
XIII.	ARCTIC-ALPINE VEGETATION, BY W. G. SMITH	288
	The Vegetation of Ben Lawers	292
	1. <i>Zone of Cultivation and Pasture</i>	293
	2. <i>Zone of Closed Moorland Associations</i>	296
	3. <i>Zone of Arctic-Alpine vegetation</i>	298
	Arctic-Alpine grassland formation	298
	Upper Arctic-Alpine formations	302
	I. Formation of mountain-top detritus	310
	Snow-patch vegetation	316
	II. Arctic-Alpine chomophyte formation	317
	A. Open communities on exposed rock-faces	321
	B. Association of sheltered ledges	323
	C. Association of shade chomophytes	324
	D. Association of hydrophilous chomo- phytes	325
	Synopsis of Scottish Arctic-alpine Vegetation	328
XIV.	THE VEGETATION OF THE SEA COAST	330
	I. The Salt-marsh formation	330
	1. Glasswort association (<i>Salicornietum europææ</i>)	332
	1a. Cord-grass association (<i>Spartinetum</i>)	333
	2. General salt-marsh association	333
	3. <i>Glycerietum maritimæ</i>	333
	4. Sea-rush association (<i>Juncetum maritimi</i>)	334
	Association of spray-washed cliffs and rocks	335
	Brackish water associations	335
	The Salt marsh formation of the Hampshire Coast, by W. M. Rankin	336

CHAP.		PAGE
XIV. <i>cont.</i>	Cord-grass association (<i>Spartinetum</i>)	337
	<i>Glycerietum maritimæ</i>	338
II.	The Sand dune formation	339
	Association of Strand plants	340
	1. Sea couch-grass association (<i>Agropyretum juncei</i>)	342
	2. Marram-grass association (<i>Ammophiletum arenariæ</i>)	342
	Fixed dune associations—Dune scrub, Dune grassland	345
	Association of dune marshes	346
	The Sand dune vegetation of the Lancashire coast	346
	Sea couch-grass association	348
	Marram or Star-grass association	349
	Dry association of <i>Salix repens</i>	350
	Damp association of <i>Salix repens</i>	351
	Dune marsh association	351
	Grassland-association of dune hollows	351
III.	Shingle-beach communities	352
	The Maritime formations of Blakeney Harbour, by F. W. Oliver.	
	I. Topographical structure of the area	354
	II. The Vegetation.	
	1. The Shingle-beach communities	360
	2. The Sand dune formation	362
	Association of strand plants	363
	Association of marram-grass	363
	Association of fixed dunes	363
	3. The Salt-marsh formation	363
	The Blakeney Point series	363
	“The Marams”	364
	Association of <i>Glyceria maritima</i>	365
	Association of <i>Juncus maritimus</i>	366
	BIBLIOGRAPHY OF PAPERS ON BRITISH VEGETATION	367
	INDEX OF PLANT NAMES	369
	GENERAL INDEX	387

LIST OF PLATES

		<i>To face page</i>
I	a. Oakwood on Weald Clay (S. Mangham).	
	b. Oak-hazel copse on Clay-with-flints (S. Mangham) .	79
II	a. Oakwood on Weald Clay—prevernal aspect (A. G. Tansley).	
	b. Oaks and Neutral pasture (A. G. Tansley) . . .	83
III	a. Dry oakwood on sandy loam—general (S. Mangham).	
	b. Ditto. <i>Holcus mollis</i> and <i>Pteris aquilina</i> (R. S. Adamson)	93
IV	a. Oak-birch heath, Ashdown Forest (S. Mangham).	
	b. Ditto. Toy's Hill (S. Mangham)	100
V	a. Oak-birch heath—general, Ashdown Forest (S. Mangham).	
	b. Birch wood, Ashdown Forest (S. Mangham) . . .	102
VI	a. Heath association, Ashdown Forest (S. Mangham).	
	b. Ditto (S. Mangham)	104
VII	a. Subspontaneous pinewood, Crockham Hill (A. G. Tansley).	
	b. Chert diggings with heath (A. G. Tansley) . . .	117
VIII	a. Pine heath, Black Wood of Rannoch (A. G. Tansley).	
	b. Pine heath, Rothiemurchus Forest (A. G. Tansley) .	118
IX	a. Wood of <i>Quercus sessiliflora</i> : <i>Holcus mollis</i> , etc. (W. B. Crump).	
	b. Wood of <i>Quercus sessiliflora</i> : with <i>Vaccinium Myrtillus</i> (W. B. Crump)	127
X	Siliceous grassland: facies of <i>Ulex Gallii</i> , Wicklow Mountains (R. Welch)	134
XI	<i>Arbutus Unedo</i> at Killarney (R. Welch).	139
XII	a. Highland birchwoods, Kinloch Rannoch (A. G. Tansley).	
	b. Dittö. Near Aviemore (A. G. Tansley)	142
XIII	a. Limestone scrub, Ebbor Gorge (W. B. Crump).	
	b. Ashwood ground vegetation (W. B. Crump) . . .	147
XIV	a. Ashwood on limestone hill, Anstwick (W. M. Rankin).	
	b. Ashwood on limestone pavement (W. M. Rankin) .	151
XV	Limestone pavement, Co. Clare (R. Welch).	160
XVI	a. Beechwood and Chalk grassland (S. Mangham).	
	b. Interior of beechwood (S. Mangham)	163
XVII	Beechwood, Ditcham Park (C. J. P. Cave)	165

List of Plates

	<i>To face page</i>
XVIII a. Beechwood ground vegetation (A. G. Tansley).	
b. Degenerating beechwood (W. M. Rankin)	166
XIX a. Yew wood on chalk (A. G. Tansley).	
b. Ditto (A. G. Tansley)	170
XX a. Chalk scrub, Butser Hill (W. M. Rankin).	
b. Ditto. Kemsing (S. Mangham)	171
XXI a. General view of broads and fen (F. F. Blackman).	
b. Typha angustifolia and Myriophyllum spicatum (F. F. Blackman)	221
XXII a. Scirpus lacustris and Castalia alba (M. Pallis).	
b. Detail of fen association (M. Pallis)	228
XXIII a. Swamp-carr and tussock swamp (M. Pallis).	
b. Yare valley fen (M. Pallis)	232
XXIV Development of fen carr (M. Pallis)	236
XXV a. Heather moor (W. B. Crump).	
b. Cotton-grass moor (W. B. Crump)	268
XXVI a. Retrogressive moor (A. Wilson).	
b. Rubus Chamæmoros (F. H. Graveley)	281
XXVII a. Arctic-alpine grassland (A. G. Tansley).	
b. Hydrophilous chomophytes (F. F. Laidlaw)	300
XXVIII a. Erigeron alpinum (F. F. Laidlaw).	
b. Salix reticulata and Rhacomitrium lanuginosum (F. F. Laidlaw)	322
XXIX a. Salicornietum. The Wash (R. H. Yapp).	
b. General salt marsh, Holme-by-the-Sea (R. H. Compton)	332
XXX a. Channel with Atriplex portulacoides (S. Hastings).	
b. Glycerietum and Salicornia (F. F. Blackman)	333
XXXI Juncus maritimus, Erquy (F. F. Blackman)	334
XXXII a. Strand plants of Arenaria peploides (R. H. Compton).	
b. Ammophila and Elymus (A. G. Tansley)	342
XXXIII a. Hippophaë rhamnoides (A. G. Tansley).	
b. Hippophaë, Rubus, Lonicera, Polypodium (A. G. Tansley)	345
XXXIV a. Dunes with Agropyron junceum (W. Ball).	
b. Dune valley with Salix repens, etc. (W. Ball)	349
XXXV View near Blakeney Point (F. W. Oliver)	361
XXXVI a. Blakeney shingle-beach (F. W. Oliver).	
b. Ammophila seedlings on shingle (F. W. Oliver)	362
