## CAMBRIDGE LIBRARY COLLECTION

*Books of enduring scholarly value*

### **Travel and Exploration**

The history of travel writing dates back to the Bible, Caesar, the Vikings and the Crusaders, and its many themes include war, trade, science and recreation. Explorers from Columbus to Cook charted lands not previously visited by Western travellers, and were followed by merchants, missionaries, and colonists, who wrote accounts of their experiences. The development of steam power in the nineteenth century provided opportunities for increasing numbers of 'ordinary' people to travel further, more economically, and more safely, and resulted in great enthusiasm for travel writing among the reading public. Works included in this series range from first-hand descriptions of previously unrecorded places, to literary accounts of the strange habits of foreigners, to examples of the burgeoning numbers of guidebooks produced to satisfy the needs of a new kind of traveller - the tourist.

### **Travels in Germany and Russia**

Sir Adolphus Slade (1804–77), British naval officer and author, documents his experiences crossing Europe to Turkey in these detailed and richly worded travel journals. Having joined the Royal Navy at a young age, he was promoted to Lieutenant in 1827. Subsequently, he was posted on several missions to Turkey and Greece, in between which he would take the opportunity for personal travel and writing. This is one among several works recording his travels across Europe; he was later appointed administrative head of the Turkish Navy (his history of the Crimean War is also reissued in this series). This collection of accounts, first published in 1840, has a remarkably broad scope. Slade covers peculiarities and specificities of tradition, landscape, class, politics and architecture, often describing encounters with individuals. He draws comparisons with England, presenting the reader with a double cultural insight in a fascinating example of nineteenth-century travel writing.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
