CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

History

The books reissued in this series include accounts of historical events and movements by eye-witnesses and contemporaries, as well as landmark studies that assembled significant source materials or developed new historiographical methods. The series includes work in social, political and military history on a wide range of periods and regions, giving modern scholars ready access to influential publications of the past.

Memoirs of the Courts of Berlin, Dresden, Warsaw, and Vienna, in the Years 1777–79

Nathaniel Wraxall (1751–1831) worked for the East India Company before becoming an MP in 1780. He travelled extensively in Europe and moved in royal and diplomatic circles, collecting anecdotes which later made their way into several popular travel narratives and memoirs that were to bring him great fame. In this work, published in two volumes in 1799 and using an epistolary form, Wraxall gives his impressions of a number of European courts that he visited in the late 1770s. Volume 2 describes Poland as a country in decline, and discusses the historical background to its present condition. He also provides anecdotes of the court and people of Vienna, and especially of the Habsburg monarchs Maria Theresa and Joseph II.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
