## CAMBRIDGE LIBRARY COLLECTION

*Books of enduring scholarly value*

### History

The books reissued in this series include accounts of historical events and movements by eye-witnesses and contemporaries, as well as landmark studies that assembled significant source materials or developed new historiographical methods. The series includes work in social, political and military history on a wide range of periods and regions, giving modern scholars ready access to influential publications of the past.

### The Tea Industry in India

The origins of tea-brewing in India and China are still lost to history. In this 1882 guide to the Indian tea industry, Samuel Baildon (a tea-planter about whom little is known) describes some of the earliest theories and legends surrounding it, including both botanical speculations and the Chinese stories of Bodhidharma, the Indian monk said to have introduced tea to China and Japan. Well-versed in the investment opportunities of the Indian plantations, Baildon also provides a frank tour of the nineteenth-century industry. He includes advice for investors, who he insists must not try to assist the managers of their plantations, and for potential tea-planters, who he strongly discourages from the profession if they enjoy free time, reading, or friends. With specific and anecdotal accounts of the plantations written for newcomers to the trade, this candid guide now represents an invaluable resource for students of colonial history and agriculture.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
