CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Literary Studies

This series provides a high-quality selection of early printings of literary works, textual editions, anthologies and literary criticism which are of lasting scholarly interest. Ranging from Old English to Shakespeare to early twentieth-century work from around the world, these books offer a valuable resource for scholars in reception history, textual editing, and literary studies.

Stratford-on-Avon

Sir Sidney Lee (1859–1926) was a lifelong scholar and enthusiast of Shakespeare, but is also remembered as the ‘sub-editor’ recruited by Sir Leslie Stephen when he was embarking on the project of the *Dictionary of National Biography*, and whose editorial and organisational skills were vital in keeping the publication programme close to its planned schedule. His own contributions to the *Dictionary* included an account of the life of Queen Victoria and (in Volume 51, 1897) William Shakespeare. This study of Stratford-on-Avon was first published in 1885, and the greatly enlarged version, reissued here, in 1890. (In 1898 Lee produced his biography of Shakespeare (also reissued in this series), regarded for much of the twentieth century as the most reliable account of Shakespeare’s life.) This illustrated work draws on the archival material then available to provide a history of the town of Stratford up to the time of Shakespeare’s death.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
