CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Classics

From the Renaissance to the nineteenth century, Latin and Greek were compulsory subjects in almost all European universities, and most early modern scholars published their research and conducted international correspondence in Latin. Latin had continued in use in Western Europe long after the fall of the Roman empire as the lingua franca of the educated classes and of law, diplomacy, religion and university teaching. The flight of Greek scholars to the West after the fall of Constantinople in 1453 gave impetus to the study of ancient Greek literature and the Greek New Testament. Eventually, just as nineteenth-century reforms of university curricula were beginning to erode this ascendancy, developments in textual criticism and linguistic analysis, and new ways of studying ancient societies, especially archaeology, led to renewed enthusiasm for the Classics. This collection offers works of criticism, interpretation and synthesis by the outstanding scholars of the nineteenth century.

The History of the Decline and Fall of the Roman Empire

The pre-eminent historian of his day, Edward Gibbon (1737–94) produced his *magnum opus* in six volumes between 1776 and 1788. Reissued here is the authoritative seven-volume edition prepared by J.B. Bury (1861–1927) between 1896 and 1900. Immediately and widely acclaimed, Gibbon's work remains justly famous for its magisterial account of Roman imperialism and Christianity from the first century CE through to the fall of Constantinople and beyond. Innovative in its use of primary sources and notable for its tone of religious scepticism, this epic narrative stands as a masterpiece of English literature and historical scholarship. Volume 6 covers the period from the seventh to the fourteenth centuries CE, addressing the Arab sieges of Constantinople, the culture of the Eastern Empire at the end of the first millennium, the origins of the Bulgarian, Hungarian and Russian peoples, the rise of the Turks and the conquest of Asia Minor, and the Crusades.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.

NOTE

I AM fortunate enough to have again received generous help from my friend Mr. Stanley Lane-Poole in the revision of four chapters in this volume which deal with oriental history.
