## CAMBRIDGE LIBRARY COLLECTION

*Books of enduring scholarly value*

### **Printing and Publishing History**

The interface between authors and their readers is a fascinating subject in its own right, revealing a great deal about social attitudes, technological progress, aesthetic values, fashionable interests, political positions, economic constraints, and individual personalities. This part of the Cambridge Library Collection reissues classic studies in the area of printing and publishing history that shed light on developments in typography and book design, printing and binding, the rise and fall of publishing houses and periodicals, and the roles of authors and illustrators. It documents the ebb and flow of the book trade supplying a wide range of customers with products from almanacs to novels, bibles to erotica, and poetry to statistics.

### **Bibliotheca Spenceriana**

At his death, George Spencer (1758–1834) had created the greatest private library in Europe. At the time, many aristocrats were spending huge sums acquiring rare printed books. With monastic and aristocratic libraries in Europe being dissolved, collectors had access to thousands of examples. The second Earl Spencer's interests were in English 'black-letter' printing, especially the works of Caxton, and continental incunables, particularly first editions of Greek and Latin classics. Thomas Dibdin (1776–1847) was employed as Spencer's librarian and visited Europe searching for new acquisitions. Published in 1814–15, this catalogue is of the earliest and rarest items in the collection. Each is described in detail, with reproductions of woodcuts and engravings, making this a fascinating record of one man's commitment to collecting the earliest examples of this revolutionary invention. Volume 2 covers the many first editions of Greek and Latin classics, predominantly from Italy, including examples by Valdarfer.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
