## CAMBRIDGE LIBRARY COLLECTION

*Books of enduring scholarly value*

### Classics

From the Renaissance to the nineteenth century, Latin and Greek were compulsory subjects in almost all European universities, and most early modern scholars published their research and conducted international correspondence in Latin. Latin had continued in use in Western Europe long after the fall of the Roman empire as the lingua franca of the educated classes and of law, diplomacy, religion and university teaching. The flight of Greek scholars to the West after the fall of Constantinople in 1453 gave impetus to the study of ancient Greek literature and the Greek New Testament. Eventually, just as nineteenth-century reforms of university curricula were beginning to erode this ascendancy, developments in textual criticism and linguistic analysis, and new ways of studying ancient societies, especially archaeology, led to renewed enthusiasm for the Classics. This collection offers works of criticism, interpretation and synthesis by the outstanding scholars of the nineteenth century.

### The Journal of Classical and Sacred Philology

Contemporaries as Cambridge undergraduates in the late 1840s, Joseph Barber Lightfoot (1828–89), Fenton John Anthony Hort (1828–92), and John Eyton Bickersteth Mayor (1825–1910) all went on to distinguished careers. Mayor, a classical scholar, became President of St John's, while Lightfoot and Hort – members, along with Brooke Foss Westcott (1825–1901), later Regius Professor of Divinity, of the 'Cambridge triumvirate' – were eventually appointed respectively Bishop of Durham and Lady Margaret Professor of Divinity at Cambridge. This short-lived triannual journal, which they founded and edited from 1854 to 1859, is interesting both for its combination of classical and patristic material, illuminating the close relationship between theology and classics as disciplines in the period, and as an example from the early history of academic journals, an emerging genre which would develop into its current form over the following decades. Volume 1, published in 1854, contains the year's three issues.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
