Books of enduring scholarly value

Naval and Military History

This series includes accounts of sea and land campaigns by eye-witnesses and contemporaries, as well as landmark studies of their social, political and economic impacts. The series focuses mainly on the period from the Renaissance to the end of the Victorian era. It includes major concentrations of material on the American and French revolutions, the British campaigns in South Asia, and nineteenth-century conflicts in Europe, such as the Peninsular and Crimean Wars. Although many of the accounts are semi-official narratives by senior officers and their relatives, the series also includes alternative viewpoints from dissenting leaders, servicemen in the lower ranks, and military wives and civilians caught up in the theatre of war.

Narrative of Services in the Liberation of Chili, Peru, and Brazil, from Spanish and Portuguese Domination

The most renowned naval officer of the mid-nineteenth century, Thomas Cochrane, tenth Earl of Dundonald (1775–1860), led an eventful life. Due to a financial scandal, he left the Royal Navy for a period and became a celebrated mercenary. Volume 2 of this two-volume work, published in 1859, concerns the period, from 1823, of Cochrane's command of the Brazilian navy. It addresses the recruitment of seamen and the strengthening of the fleet, his negotiations with the government for payment, and his eventual resignation after independence had been secured in 1825. Cochrane did not achieve the same level of battle engagement and naval success as he had done in Chile; rather, his time in Brazil was largely characterised by infighting, bitterness and administrative machinations. Cochrane was the quintessential naval hero of the age, and his memoir remains of interest to both scholars and readers of maritime adventure.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
