*Books of enduring scholarly value*

### Naval and Military History

This series includes accounts of sea and land campaigns by eye-witnesses and contemporaries, as well as landmark studies of their social, political and economic impacts. The series focuses mainly on the period from the Renaissance to the end of the Victorian era. It includes major concentrations of material on the American and French revolutions, the British campaigns in South Asia, and nineteenth-century conflicts in Europe, such as the Peninsular and Crimean Wars. Although many of the accounts are semi-official narratives by senior officers and their relatives, the series also includes alternative viewpoints from dissenting leaders, servicemen in the lower ranks, and military wives and civilians caught up in the theatre of war.

### History of the War in France and Belgium, in 1815

Originally published in 1844, this two-volume work by William Siborne (1797–1830) represented the first major history of the Waterloo Campaign that was based on eyewitness accounts. Although Siborne, an infantry officer, had not served in the campaign himself, he did write to scores of officers who had, and their replies provided him with information he later used to construct the famous but controversial model of the field at Waterloo, which earned him the enmity of the Duke of Wellington (largely because Siborne's view of events conflicted with the Duke's). Siborne used much of the material for this book, which covers the entire campaign from Napoleon's escape from Elba in February 1815, through the battles of Ligny, Quatre Bras and Waterloo, right up to the Allies' entry into Paris in July. The maps published in a third volume can be viewed online. Volume 2 covers the greater part of the Battle of Waterloo and its aftermath.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
