## CAMBRIDGE LIBRARY COLLECTION

*Books of enduring scholarly value*

### **Art and Architecture**

From the middle of the eighteenth century, with the growth of travel at home and abroad and the increase in leisure for the wealthier classes, the arts became the subject of more widespread appreciation and discussion. The rapid expansion of book and periodical publishing in this area both reflected and encouraged interest in art and art history among the wider reading public. This series throws light on the development of visual culture and aesthetics. It covers topics from the Grand Tour to the great exhibitions of the nineteenth century, and includes art criticism and biography.

### **Memorials of Edward Burne-Jones**

Sir Edward Coley Burne-Jones (1833–98) emerged from a solitary, motherless childhood to form close friendships with William Morris and such other luminaries of the Victorian art world as Dante Gabriel Rossetti and John Ruskin. A second generation Pre-Raphaelite and founder member of the Morris firm, he was influential in many areas, from painting, stained glass and tapestry design to book illustration. His later work, including such iconic paintings as *The Wheel of Fortune*, *The Golden Stairs* (which caused a sensation when exhibited at the Grosvenor Gallery) and *The Sleep of Arthur in Avalon*, influenced and exemplified the Aesthetic Movement, and inspired the European Symbolists. His wife, Georgiana Burne-Jones (1840–1920), published this engaging two-volume biography in 1904. Volume 1 describes his formative years, important early relationships, projects such as the murals for the Oxford Union debating chamber, and his arrival at full maturity with the St George series of 1865–7.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
