## CAMBRIDGE LIBRARY COLLECTION

*Books of enduring scholarly value*

### European History

This series includes accounts of historical events and movements by eye-witnesses and contemporaries, as well as landmark studies that assembled significant source materials or developed new historiographical methods. It covers the social and political history of continental Europe from the Renaissance to the end of the nineteenth century, and its broad range includes works on Russia and the Balkans, revolutionary France, the papacy and the inquisition, and the Venetian state archives.

### Madame de Staël

An accomplished biographer of figures ranging from Talleyrand to Cardinal Newman, Charlotte Blennerhassett (1843–1917) originally published this three-volume study in German. Reissued here is the English translation of 1889 by J.E. Gordon Cumming. Madame de Staël (1766–1817), an intellectual in Paris at the turn of the nineteenth century, was ranked by Auguste Comte as among the ‘great men’ of the era. A novelist, *salonnière*, literary and social critic, and follower of Rousseau, she became keenly involved in the opposition to Louis XVI. Volume 2 of Blennerhassett’s authoritative study addresses Madame de Staël’s life from the Revolution through to the first decade of the nineteenth century, examining the ascent of Napoleon, with whom she strongly disagreed, and her exile to Coppet in Switzerland – where she organised her famous salon – as well as her celebrated visit to England and travels in Germany.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
