CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Printing and Publishing History

The interface between authors and their readers is a fascinating subject in its own right, revealing a great deal about social attitudes, technological progress, aesthetic values, fashionable interests, political positions, economic constraints, and individual personalities. This part of the Cambridge Library Collection reissues classic studies in the area of printing and publishing history that shed light on developments in typography and book design, printing and binding, the rise and fall of publishing houses and periodicals, and the roles of authors and illustrators. It documents the ebb and flow of the book trade supplying a wide range of customers with products from almanacs to novels, bibles to erotica, and poetry to statistics.

Mss. Codices Hebraici Bibliothecae I.B. De-Rossi Accurate ab Eodem Descripti et Illustrati

Published in 1803, this is the second part of a three-volume descriptive catalogue of the Hebrew codices in the personal library of Giovanni Bernardo De Rossi (1742–1831), professor of oriental languages at the University of Parma. Each codex is numbered and its contents briefly described in Latin. Volume 2 features descriptions of codices 347–858 from a total of 1,377. De Rossi was an important collector of manuscripts and incunabula, and an authority on Hebrew typography and textual variants. The Hebrew manuscripts described in this catalogue were obtained as a result of his exhaustive researches into variant readings of the Old Testament, the results of which he published as *Variae lectiones veteris testamenti* (1784–8). He also produced groundbreaking studies of printed Hebrew texts, and a catalogue of Jewish anti-Christian polemics, *Bibliotheca judaica antichristiana* (also reissued in this series).

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
