INTRODUCTION	PAGE ix
--------------	------------

CHAPTER I.

ON THE STEAM ENGINE.

Object of the Treatise—Progress of the Steam Engine—great alteration in Naval Tactics—Comparative Advantages—Principles and Power of the Steam Engine—Marquis of Worcester—Captain Savary—description of his Engine—Trial Cocks and Safety Valves—Newcomen's Engine—Beighton's Engine—Engine Boilers—Watt's Single Engine—his Double acting Engine—of Steam Valves, Parallel Motions, and other Appendages to the Engine—Engines of Hornblower, Trevethick, and Woolfe—Messrs. Maudslay and Co's. Ship Engine	1
---	---

CHAPTER II.

STEAM SHIPS AND VESSELS.

Various Classes—variety in Construction—Plan of fortifying the Paddle Wheels—Dimensions of the Town of Drogheda steam vessel—most approved construction of the Bow—necessary additions—MASTS, YARDS, AND RIGGING—respecting the Masts and Yards—compared to Sailing Vessels' Masts— <i>The Rigging Peculiar to a Steam Ship</i> —their proportion compared to Sailing Ships—Advantages—the constructing of Steam Vessels as auxiliaries to ships of war—their importance—Steam Vessels for the Defence of the Coast—can be made proof against shot—Steam Vessels for the protection of Trade—East India Company—Steam Vessels for mercantile purposes—Armament— <i>Placing the Engines</i> —disadvantage of the Waggon Boiler	65
---	----

(vi)

CHAPTER III.**TACTICS PECULIAR TO STEAM NAVIGATION.**

	PAGE.
The Commander—the Engineer, Crew, Officers, Anchoring—ditto in a Tidesway— in a Storm—in a Calm—Underway—Light Breeze—ditto abaft the Beam— ditto before the Wind—a Gale—on the quarter—before it—Lying to in a Gale—Head way—Stern way—being on shore—taken aback—assisting Ships in distress—in cases of fire—Boats—Accidents to Boats, &c. - - -	82

CHAPTER IV.**NAVAL WARFARE.**

Steam Vessels as auxiliaries to Men of War—Chasing—Action—as Men of War— flotillas—singly—various manœuvres and evolutions—modes of attack— defence—forming the line—order of sailing, &c. - - - - -	107
--	-----

CHAPTER V.**CONVOYS AND COMMERCE BY STEAM SHIPS.**

Comparative advantages of Steam and Sailing Vessels—their size—of taking Vessels in tow—keeping the Convoy within its limits—Capture—Re-capture—Fuel— method of supplying it at sea in long voyages - - - - -	119
---	-----

CHAPTER VI.**DEFENCE OF THE NATION BY STEAM SHIPS.**

Parts of the Coast requiring it most—Nature of the Vessels for that Service— Harbours necessary for them—great advantage in that mode of defence— security greater—obstacles to invasion, &c. - - - - -	129
---	-----

(vii)

CHAPTER VII.**RULES AND REGULATIONS.**

	<small>PAGE.</small>
Importance of establishing Regulations—Causes of Accidents—Remedy—Proposed Rules and Regulations—by day—by night—fog—necessity of inspection—Tables of Dimensions—Tables of the Crews and Equipment - -	137

CHAPTER VIII.

On the recent Improvements in the Steam Engine by Gurney, Perkins, &c.—Conclusion of the subject—List of Works on the Steam Engine - -	149
--	-----

CHAPTER IX.

Royal Clarence Sextant, for measuring the exact distance of an object in view—Tables to be used with a common Sextant—and correction—improvements, &c. - -	175
--	-----

APPENDIX.

Chronological Account of Discoveries and Improvements on the Steam Engine—including Patents—with Remarks on their application to Maritime Purposes Parliamentary Evidence, with remarks on it—Abstract of an Act of Parliament Index, &c. - - - - -	1
---	---
