

CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Art and Architecture

From the middle of the eighteenth century, with the growth of travel at home and abroad and the increase in leisure for the wealthier classes, the arts became the subject of more widespread appreciation and discussion. The rapid expansion of book and periodical publishing in this area both reflected and encouraged interest in art and art history among the wider reading public. This series throws light on the development of visual culture and aesthetics. It covers topics from the Grand Tour to the great exhibitions of the nineteenth century, and includes art criticism and biography.

Memorials of Edinburgh in the Olden Time

Born in Edinburgh, Daniel Wilson (1816–92) initially pursued an artistic career and spent time in Turner's studio. However, in 1846 he became a fellow of the Society of Antiquaries of Scotland and devoted the rest of his life to archaeology, anthropology and university administration. He was active in the Society's attempts to save historic buildings in Edinburgh, and the city's built environment was the subject of this two-volume 1848 work, which is illustrated with engravings after his own drawings. In Volume 2, Wilson continues to cover local antiquities and traditions, with each chapter looking at a different area of the Old Town. Leith, the New Town, and ecclesiastical buildings are also discussed. The historical detail, with references, is immense, and Wilson's enthusiasm for his city is evident throughout. Wilson's second major work, the landmark *Prehistoric Annals of Scotland* (second edition, 1863), is also reissued in this series.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
