CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

European History

This series includes accounts of historical events and movements by eye-witnesses and contemporaries, as well as landmark studies that assembled significant source materials or developed new historiographical methods. It covers the social and political history of continental Europe from the Renaissance to the end of the nineteenth century, and its broad range includes works on Russia and the Balkans, revolutionary France, the papacy and the inquisition, and the Venetian state archives.

Berlin under the New Empire

In the wake of German unification in 1871, Berlin became a place of increased interest to the other nations of Europe. The journalist Henry Vizetelly (1820–94) made his first journey to the capital of the new empire in 1872. Based on observations from a series of visits, this two-volume work presents a witty and detailed portrait of the city and its inhabitants. The topics covered in Volume 2 include the Prussian Landtag, the Reichstag, Berlin's places of education, its palaces, churches and museums, and its restaurants, cafés and beer gardens. Chapters on theatre, music, satire and socialism give a vivid sense of the cultural and political zeitgeist. Illustrated with hundreds of engravings from designs by German artists, the work first appeared in 1879. *Vizetelly's Paris in Peril* (1882) and *Glances Back Through Seventy Years* (1893) are also reissued in this series.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
