CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Literary studies

This series provides a high-quality selection of early printings of literary works, textual editions, anthologies and literary criticism which are of lasting scholarly interest. Ranging from Old English to Shakespeare to early twentieth-century work from around the world, these books offer a valuable resource for scholars in reception history, textual editing, and literary studies.

The Private Correspondence of David Garrick with the Most Celebrated Persons of His Time

David Garrick (1717–79) is synonymous with the golden age of English theatre. Widely acclaimed as an actor, he went on to become a shrewd theatre manager at Drury Lane. His years in charge of the Theatre Royal ensured its dramatic ascendancy and burnished his own considerable celebrity. These letters, first published in 1831, reveal Garrick's gregarious nature and shed light on his many friendships with leading ladies, fellow actors, contemporary playwrights, and members of high society. His love of Shakespeare's work is also evident, highlighting Garrick's pivotal role in ensuring the plays became established in the national consciousness. This two-volume collection was edited by James Boaden (1762–1839), who published several theatrical biographies (also reissued in this series). Volume 2 contains letters from the final years of Garrick's life, notably his correspondence in French with influential figures in Parisian theatre.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
