CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Literary Studies

This series provides a high-quality selection of early printings of literary works, textual editions, anthologies and literary criticism which are of lasting scholarly interest. Ranging from Old English to Shakespeare to early twentieth-century work from around the world, these books offer a valuable resource for scholars in reception history, textual editing, and literary studies.

Five Hundred Points of Good Husbandry

A singer and poet as well as a farmer, Thomas Tusser (c.1524–80) first produced his verse manual on farming in the mid-sixteenth century. Since then, it has gone through more than a dozen editions. This 1812 version is a collation of three of the poem's early editions. Editor William Mavor (1758–1812) provides a biographical sketch of Tusser, modernises the work's orthography and punctuation, and includes page-by-page annotations on subject matter and difficult points of language. The work divides into two: the first half, structured around the farming calendar, deals with the cultivation of open and enclosed land, while the second contains 'points of huswifery', arranged loosely around the working day. Tusser writes from the perspective of a tenant farmer, notably placing emphasis on the often overlooked benefits of land enclosure as well as on the role of women in farm labour.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
