

## CONTENTS.

### INTRODUCTION.

	PAGE
Signal part of Holland on the theatre of the world . . . . .	1
Primeval examples in enterprise . . . . .	2
Phœnicians and Phœnicia . . . . .	3
Carthaginian vessels . . . . .	4
Discovery of America . . . . .	5
The Netherlands and Venice . . . . .	6
Adventurous voyages of the Northmen . . . . .	7
Discovery of Iceland and Greenland . . . . .	8
Frisians with King Alfred and in the Arctic . . . . .	9

### CHAPTER I.

#### THE GRAND MODERN EXEMPLAR.

A geographical problem . . . . .	10
The Antarctic and Arctic regions contrasted . . . . .	11
Former objects of Arctic discovery . . . . .	12
England's prominence in Arctic enterprise . . . . .	13
England and the North-East Passage . . . . .	14
The North-West Passage the mercantile dream . . . . .	15
The Holy Grail to British seamen . . . . .	16
Searching expeditions inaugurate the new era . . . . .	17
Expedition under Kane, and his wild reckoning . . . . .	18

*CONTENTS.*

## CHAPTER II.

## HOLLAND'S ENTERPRISE AND DUTY.

	PAGE
Attractiveness of the Arctic field . . . . .	19
Holland and Arctic discovery . . . . .	20
An incentive to claim her old position in Europe . . . . .	21
Voyages of Barents and her early navigators . . . . .	22
Holland and modern Arctic research . . . . .	23
Her sacrifices on the altar of Nile exploration . . . . .	24
The Dutch and Arctic whaling ventures . . . . .	25
Her early landmarks disregarded in the North . . . . .	26
More successful in her nomenclature in the New World . . . . .	27
Her enterprise and spirit appealed to . . . . .	28
Her war in the antipodes need not discourage her for the Arctic . . . . .	29
A counter-argument in her vast home enterprises . . . . .	30
Amsterdam a promoter of Arctic discovery . . . . .	31
Individual enterprise in discovery expeditions . . . . .	32
The "Alert" and "Discovery" contrasted with the early ships . . . . .	33

## CHAPTER III.

## GOVERNMENT EXPEDITIONS.

Value of Government expeditions . . . . .	34
Importance of naval discipline . . . . .	35
Dangers of Arctic navigation over-estimated . . . . .	36
Fascination of Arctic service for seamen . . . . .	37
Important testimony of Dr. Hayes . . . . .	38
Advanced stage of Arctic navigation . . . . .	39
One of the early Dutch expeditions a Government one . . . . .	40
States-General closed the record offering a reward . . . . .	41

## CHAPTER IV.

## POLAR PROBLEMS.

Query as to the solution of the Polar mystery . . . . .	42
The dreams of Golcondas dispelled . . . . .	43

*CONTENTS.* xi

	PAGE
Results of last American expedition cited . . . . .	44
Robeson Channel and the Northern outlook . . . . .	45
Flight of birds towards the Pole . . . . .	46
The dumb guides to the Pole the truest ones . . . . .	47
Kane on the "open Polar Sea" . . . . .	48
Illusory discoveries . . . . .	49
Kane's recapitulation of facts . . . . .	50
Hayes on the "open Polar Sea" . . . . .	51
Describes the unknown region by the map . . . . .	52
Makes the Pole a large sharer in the mysteries of the universe	53
Argues in favour of an open sea except near land . . . . .	54

CHAPTER V.

OPINIONS OF THE GEOGRAPHERS.

Existence of an open Polar Sea among the problems . . . . .	55
Opinions of Drs. Petermann and Chavanne . . . . .	56
Sir Edward Sabine on these questions . . . . .	57
Opinion of Sir Roderick Murchison . . . . .	58
Opinions of Lieutenant Maury and the French geographers . . . . .	59
Views of Professor C. Wyville Thomson . . . . .	60
Leading English Arctic authorities sceptical . . . . .	61
Work of the future Arctic explorer . . . . .	62
The "Alert" and "Discovery" gone forth to serve the world . . . . .	63

CHAPTER VI.

THE ARCTIC REVIVAL.

Hopes of present English expedition . . . . .	64
Subject of routes and the revival of Arctic enterprise . . . . .	65
Royal Geographical Society of London first to move . . . . .	66
Plan of Captain Osborn . . . . .	67
Project of Dr. Petermann . . . . .	68
Admiralty then insusceptible to eloquence or argument . . . . .	69
Other countries meanwhile awakened . . . . .	70

	PAGE
Disappointing results of the German expeditions . . . . .	71
France and Gustave Lambert . . . . .	72
French expedition by Behring's Straits proposed . . . . .	73
Induced to sketch history of M. Lambert's project . . . . .	74
His scheme laid before the Société de Géographie . . . . .	75
Favoured by the learned societies of France . . . . .	76
Encouragement and subscription of the Emperor . . . . .	77
Failure of the Lambert expedition and death of the projector . . . . .	78
The "Boreal" and M. Malte-Brun's account (in note) . . . . .	79
France accredited with gallant intentions . . . . .	80
Renewal of the Arctic question by Captain Osborn . . . . .	81
An advocate of the Smith Sound route in Captain Hall . . . . .	82
Departure of the American expedition of 1871 . . . . .	83
Murchison's proposal for a mutual plan of action . . . . .	84
American enterprise by Behring's Straits suggested . . . . .	85
Inducement to American spirit . . . . .	86
Malte-Brun's summing up of the three projects . . . . .	87

## CHAPTER VII.

## THE GULF STREAM ROUTE.

Holland and the route through the Spitzbergen seas . . . . .	88
Indications favourable to the Gulf Stream route . . . . .	89
The Gulf Stream argument itself employed . . . . .	90
An argument in the downward drift of the "Resolute" . . . . .	91
Rule applied to upward current in the European Polar seas . . . . .	92
The thermometric gateway across Barents' path . . . . .	93
First Poleward attempt in the route of the Gulf Stream . . . . .	94
Weyprecht and Payer's report . . . . .	95
Result favourable to the Novaya Zemlya base . . . . .	96
Experience of Mack and Johannesen . . . . .	97
Accidental discoveries which these exploits led to . . . . .	98
The "Resolute" and "Tegethoff" drifts . . . . .	99
Encouraging and forcible language of Professor Maury . . . . .	100
A work worthy to engage the national energies . . . . .	101
The Gulf Stream route long ago appropriated by the Dutch . . . . .	102

*CONTENTS.* xiii

CHAPTER VIII.

THE EARLY DUTCH WHALERS.

	PAGE
A moot question . . . . .	103
Master Moxon and the high latitudes . . . . .	104
Wood's voyage and discomfiture . . . . .	105
Daines Barrington and the early accounts . . . . .	106
Captain Osborn's apology for them . . . . .	107
High latitudes of Dutch and English skippers . . . . .	108
Statements not sustained by authentic proof . . . . .	109
Logical theory of the Dutch whalers . . . . .	110
Burgomaster Witsen and Roule's voyage . . . . .	111
A good suggestion in a couplet . . . . .	112

CHAPTER IX.

THE ARCTIC BARRIER AND GULF STREAM.

Uncertainties of approach to the Pole . . . . .	113
Necessity for an alternative route . . . . .	114
Reasons for first inclining to the Gulf Stream . . . . .	115
Gulf Stream itself worthy of investigation . . . . .	116
Historical illustrations applied to the Gulf Stream . . . . .	117
The Stream a marvel since Dr. Franklin's time . . . . .	118
Its wonders attested by all scientific observers . . . . .	119
Professor Wyville Thomson on the Gulf Stream . . . . .	120
Mr. James Croll's array of figures . . . . .	121
Heat of the Gulf Stream otherwise illustrated . . . . .	122
Tempers the climate of North-Western Europe . . . . .	123
Origin according to Dr. Franklin and Wyville Thomson . . . . .	124
Humboldt and D'Aubuisson cited . . . . .	125
The North Atlantic compared to a bath . . . . .	126
The downward current along Greenland . . . . .	127
Professor Buff and Mr. Findlay on the Gulf Stream . . . . .	128
A contradiction of authorities . . . . .	129
United States Coast Survey investigations . . . . .	130
Sir Charles Lyell on the Gulf Stream . . . . .	131
Opinion of Dr. Carpenter . . . . .	132
Dr. Carpenter and Professor Wyville Thomson . . . . .	133
Dr. Carpenter on the Gibraltar currents . . . . .	134
Captain Bent's explanation of Dr. Carpenter's theory . . . . .	135

	PAGE
Dr. Carpenter's theory discussed . . . . .	136
Regarded to conflict with law of the earth's rotation . . . . .	137
An alarming question raised . . . . .	138
America might cause England to become a Labrador . . . . .	139
Sir Charles Lyell leaves the result to nature and time . . . . .	140
Lieutenant Maury on the Gulf Stream . . . . .	141
The sum and substance of Maury's hypothesis . . . . .	142
Additional agencies admitted as helps to cause the Gulf Stream . . . . .	143
Dr. Carpenter and Maury not so widely apart . . . . .	144
Philosophical arguments applied to the streams and currents . . . . .	145
Professor Maury on the Thermometric theory . . . . .	146
Testimony of the counter-current . . . . .	147
Gulf Stream might reach the Pole with heat to spare . . . . .	148
Force and heat evidently not exhausted at the Arctic barrier . . . . .	149
Author's object requires the Spitzbergen alternative . . . . .	150

## CHAPTER X.

## THE ALTERNATIVE ROUTE.

Gulf Stream and Alternative routes defined . . . . .	151
Doubts as to an open way by the Gulf Stream . . . . .	152
Dr. Petermann on a penetration to the Pole with ships . . . . .	153
Lessons of experience opposed to too hopeful views . . . . .	154
Reason rather than Theory when staking human lives . . . . .	155
The Polar ice-pack a barrier hitherto unpenetrated . . . . .	156
Attempts to reach the Pole by Spitzbergen cited . . . . .	157
Experience of Nordenskiöld and the English yachtsmen . . . . .	158
Parry's effort and "open" seasons . . . . .	159
A hopeful glance at the Novaya Zemlya base . . . . .	160
Captain Allen Young on the Novaya Zemlya base . . . . .	161
The "Diana" and "Tegethoff" in Novaya Zemlya waters . . . . .	162
Spitzbergen as a base of operations . . . . .	163
Superiority of Spitzbergen on many accounts . . . . .	164
The screw-steamer in ice navigation . . . . .	165
Drifting ice-pack and open and close seasons . . . . .	166
Query as to Parry's navigable sea . . . . .	167
Proctor on the Spitzbergen route . . . . .	168
Parry's experience pointed to . . . . .	169

## CONTENTS.

xv

	PAGE
Sketch of Parry's famous attempt . . . . .	170
The "Discovery" and "Enterprise" manned and started . . . . .	171
The Herculean Poleward struggle . . . . .	172
Nordenskiöld's attempt north of Spitzbergen . . . . .	173
Parry's belief in the practicability of his route . . . . .	174

## CHAPTER XI.

## PRACTICAL QUESTIONS.

Holland's long abandonment of the Spitzbergen region . . . . .	175
Comparatively slight expense of an expedition by Spitzbergen . . . . .	176
Motive for a Dutch expedition . . . . .	177
Foreign ignorance of Holland . . . . .	178
Government direction by Spitzbergen not absolutely required . . . . .	179
Comparative certainty of important discoveries . . . . .	180
Plan of adhering to the ship preferred . . . . .	181
Hopes also from a sledge-and-boat enterprise . . . . .	182
Extensive lands in the Polar regions . . . . .	183
Dr. Petermann's configuration of Greenland . . . . .	184
Smith Sound as a safety resort . . . . .	185
English plan of approaching the Pole . . . . .	186
Preference for ship-exploration . . . . .	187
Sir James Ross in the Antarctic seas . . . . .	188
One of the practical questions . . . . .	189
Risks of Arctic adventure equalled by the rewards . . . . .	190
Important address to the King of the Netherlands . . . . .	191
Polar voyages urged in the interest of the Dutch merchant marine . . . . .	192
Hopes even of a commercial route <i>via</i> the North-East . . . . .	193
The Dutch geographers and Arctic work . . . . .	194
Sir John Barrow and the <i>cui bono</i> of Northern voyages . . . . .	195
Mr. Markham's appeal to the old Dutch spirit . . . . .	196

## CHAPTER XII.

## ANTICIPATED RESULTS.

Valuable scientific results inevitable . . . . .	197
Summary of sciences to be benefited . . . . .	198

	PAGE
Geography and cosmography first to derive advantage . . . . .	199
Hydrographical results . . . . .	200
Phenomenon of the oscillations . . . . .	201
Advantage to the science of geodesy . . . . .	202
Magnetical and electrical results . . . . .	203
Solar and stellar chemistry . . . . .	204
Spectrum analysis and the aurora . . . . .	205
Observations on the climate at the Pole . . . . .	206
Meteorological results . . . . .	207
Results in the department of zoology . . . . .	208
Polar animal kingdom and bird life . . . . .	209
Geological and palæontological results . . . . .	210
Advantage to mineralogical science . . . . .	211
Ethnographical science interested . . . . .	212
Botanical results from Arctic research . . . . .	213
Ethnology. A supposed Arctic race . . . . .	214
Grotius on the origin of the far Northern races . . . . .	215
The modern Eskimo . . . . .	216
Bancroft's ethnological classification of the Eskimo . . . . .	217
Picture of the Eskimo's life . . . . .	218
Interest to anthropological science . . . . .	219
Sum of ethnological opinions . . . . .	220
Important scientific bearings of Polar research . . . . .	221
Government rewards suggested for Arctic exploration . . . . .	222

## CHAPTER XIII.

## CONCLUSION.

Recapitulatory observations . . . . .	223
Appeal to Holland . . . . .	224
The old way of Barents left to Netherlanders . . . . .	225
New inspiration from the story of the old voyages . . . . .	226

## APPENDIX—

Chronological Table of Arctic Voyages . . . . .	227
INDEX . . . . .	249
