Books of enduring scholarly value

Egyptology

The large-scale scientific investigation of Egyptian antiquities by Western scholars began as an unintended consequence of Napoleon's invasion of Egypt during which, in 1799, the Rosetta Stone was discovered. The military expedition was accompanied by French scholars, whose reports prompted a wave of enthusiasm that swept across Europe and North America resulting in the Egyptian Revival style in art and architecture. Increasing numbers of tourists visited Egypt, eager to see the marvels being revealed by archaeological excavation. Writers and booksellers responded to this growing interest with publications ranging from technical site reports to tourist guidebooks and from children's histories to theories identifying the pyramids as repositories of esoteric knowledge. This series reissues a wide selection of such books. They reveal the gradual change from the 'tomb-robbing' approach of early excavators to the highly organised and systematic approach of Flinders Petrie, the 'father of Egyptology', and include early accounts of the decipherment of the hieroglyphic script.

The Flinders Petrie Papyri

A pioneering Egyptologist, Sir William Matthew Flinders Petrie (1853–1942) excavated over fifty sites and trained a generation of archaeologists. A great many of his publications have been reissued in this series. In the 1890s, the Irish scholar Sir John Pentland Mahaffy (1839–1919) took the lead on the considerable task of cataloguing, transcribing and commenting on the Greek papyri found by Petrie in mummy cartonnage on recent digs in Egypt. This three-volume collection is the result of his labours. The texts, comprising private correspondence, legal records, petitions and many other types of document, reveal a great deal about life in Egypt in the third century BCE. Volume 2, first published in 1893, contains eighteen autotype reproductions of key examples, as well as an introduction on the deciphering of the papyri.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
