CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Art and Architecture

From the middle of the eighteenth century, with the growth of travel at home and abroad and the increase in leisure for the wealthier classes, the arts became the subject of more widespread appreciation and discussion. The rapid expansion of book and periodical publishing in this area both reflected and encouraged interest in art and art history among the wider reading public. This series throws light on the development of visual culture and aesthetics. It covers topics from the Grand Tour to the great exhibitions of the nineteenth century, and includes art criticism and biography.

The Works of Sir Joshua Reynolds

This two-volume posthumous edition of the writings on art of Sir Joshua Reynolds (1723–92), one of the greatest of eighteenth-century artists and the first president of the Royal Academy, was published in 1797. Volume 2 contains his previously unpublished *Journey to Flanders and Holland*, which describes and comments on the paintings Reynolds examined on a two-month tour in Europe in 1781. (He visited galleries in Düsseldorf, Cologne and Aachen as well as the Low Counties.) This is followed by a long Latin poem on the art of painting, by the French artist Charles Alphonse du Fresnoy (1611–68), together with a translation by William Mason, and extensive commentary by Reynolds. Appendices include essays by Pope and Dryden on du Fresnoy's poem, and chronological and alphabetical lists of painters and their genres from Cimabue to the late seventeenth century. The book is completed by an index covering both volumes.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
