## I N D E X.

A.	PAGE	PAGE
ACHARD . . . . .	30	
Agricultural purposes, engines for .	293	
Air . . . . .	85, 91	
— and steam mixed . . . . .	89, 91	
— engines . . . . .	8	
—, motion of . . . . .	92	
— pumps . . . . .	24, 25, 91, 174, 177, 194	
— pump rods . . . . .	248	
— for fires . . . . .	126	
— flues . . . . .	141	
— regulator . . . . .	145	
Alcohol vapour, force of . . . . .	30, 32, 39, 75	
— engine . . . . .	34	
—, latent heat of . . . . .	53, 56	
— effect as fuel . . . . .	114	
Ammonia . . . . .	56, 82, 86	
Amontons' engine . . . . .	8, 16	
Apparatus for boilers . . . . .	142	
Arsberger, Professor . . . . .	72	
Ash pit . . . . .	121	
Atmosphere, pressure of . . . . .	84, 94	
Atmospheric engine . . . . .	9, 23, 36, 102, 155, 194	
—, effect of . . . . .	33, 36	
B.		
Atmospheric engine improved . . . . .	40, 198	
— piston . . . . .	225	
Banks, John . . . . .	33	
Barton's piston . . . . .	228	
— stuffing boxes . . . . .	231	
Beam, working . . . . .	10, 20	
— angular movement of limited . . . . .	241	
— strength of . . . . .	248	
Beauty essential to perfect engines . . . . .	212	
Beighton, Henry . . . . .	12	
Belidor, Bernard . . . . .	15, 224	
Bell, Henry . . . . .	44	
Bettancourt . . . . .	32, 64, 96, 220	
Bevan, B. experiment by . . . . .	305	
Black, Dr. Joseph . . . . .	21, 48	
Blake, Francis . . . . .	18	
Blakey, John . . . . .	24, 135	
Blowing through . . . . .	209	
— machines . . . . .	291	

## 362

## INDEX.

PAGE	PAGE
Boats, steam . . . . . 14, 31, 326, 329	Brunton's fire place . . . . . 141
— steam engines for . . . . . 326	Bucket, air pump . . . . . 215
— canal . . . . . 305	
Boiler with internal flue . . . . . 21, 22	
— tube . . . . . 24	
Boilers, cast iron . . . . . 261	
— surface for fire . . . . . 122	
— space for steam and water in . . . . . 127, 129	C.
— power of low pressure . . . . . 130	Cagniard de la Tour, experiments by . . . . . 73, 75, 77, 81
— number of . . . . . 131	Canal boats . . . . . 305
— form of . . . . . <i>ibid.</i>	Carbon, effect as fuel . . . . . 112
— Watt's . . . . . 132	Carbonic acid . . . . . 84, 85
— strength of . . . . . 257, 259, 260	Carburet of sulphur . . . . . 80
— size of . . . . . 133	Carriage, steam . . . . . 42, 126, 137, 294, 359
— cylindrical . . . . . 133, 260	Cartwright, Dr. Edmund . . . . . 34, 231
— rule for . . . . . <i>ibid.</i>	—'s engines . . . . . 35
— spherical . . . . . 261	—'s piston . . . . . 34, 227
— tubular . . . . . 155, 262	Cataract . . . . . 23, 274
— Rumford's . . . . . 135	Cements . . . . . 263
— Woolf's . . . . . 136, 261	— iron . . . . . <i>ibid.</i>
— with internal fires . . . . . 137	Charcoal, effect of . . . . . 112
— steam carriage . . . . . 137, 139	Chase water engine . . . . . 23, 197, 226
— supply . . . . . 137, 143	Chimney, ascent of smoke in . . . . . 106
— steam boat . . . . . 138	— areas . . . . . 151
— high pressure . . . . . 143	— tops . . . . . 152
— portable . . . . . 139	Christian, experiments by . . . . . 74
— apparatus for . . . . . 142	Clack valve . . . . . 215
— supply of with water . . . . . <i>ibid.</i>	Clement, M. . . . . 73
Boiling point of solutions . . . . . 61	Clinkers . . . . . 140
Bossut . . . . . 31, 302	Coal, effect of . . . . . 17, 118
Boulton . . . . . 28	— engines for drawing . . . . . 289
Boulton and Watt . . . . . . . . . . 23, 170, 177, 201, 204, 218	Cock, four-way . . . . . 13, 39, 183, 220
Bramah, Joseph . . . . . 31, 39, 224, 231	— double . . . . . 221
—'s slide valve . . . . . 217	Cocks . . . . . 214, 220
—'s four-way cock . . . . . 221	—, construction of . . . . . 220
Brindley . . . . . 21	Coke . . . . . 31, 118, 121
	Combined engines . . . . . 29, 189, 194, 209
	Combustion . . . . . 110, 119

## INDEX.

PAGE	PAGE
Combustion, process of . . . . .	119
Condensation . . . . .	6, 25, 34, 152
———, principles of . . . . .	152, 156
Condensers . . . . .	26, 34, 91, 176
Condensing engines, nature of . . . . .	193
——— construction of . . . . .	195
——— proportion of . . . . .	
parts . . . . .	196, 199, 201, 205
——— power of . . . . .	197, 200, 202, 206, 208, 211
——— application of . . . . .	
. . . . .	198, 200, 204, 207
Conical valves . . . . .	216
——— pendulum . . . . .	271, 272
Connecting rod . . . . .	236, 249
Contractions in pipes, effect of . . . . .	93
Corn mills . . . . .	294
Cornish reports . . . . .	287
Cooling, loss of force by . . . . .	97, 101
Cotton mills . . . . .	45, 292
Counter . . . . .	279
Counter weight . . . . .	11, 203, 267, 246
Crank . . . . .	27, 237
———, strength of . . . . .	249
Crawford, Dr. . . . .	21, 112
Creighton, W. . . . .	50, 56
——— experiments by . . . . .	71
Curr, John . . . . .	36
Currents, resistance of . . . . .	323
Cylinder, cooling in . . . . .	101
——— proportions of . . . . .	168
Cylinders, double, ratio of . . . . .	190, 200
D.	
Dalton, John . . . . .	40
E.	
Eccentric motion . . . . .	234
Edelcrantz . . . . .	147, 219
Eduction pipe . . . . .	11
Effect, useful, how to measure . . . . .	278
Elastic force of vapour . . . . .	56—89
——— of steam . . . . .	<i>ibid.</i>
———, rules for . . . . .	59
Electric fluid . . . . .	45
Emerson, William . . . . .	20, 235, 295
Eolipile . . . . .	1, 2
Equalization of the motion of engines . . . . .	255
——— by a fly . . . . .	265
——— by counter weights . . . . .	269
Equilibrium of heat . . . . .	47
Ether sulphuric . . . . .	77
———, latent heat of . . . . .	54, 56
———, elastic force . . . . .	77
Evans, Oliver . . . . .	43, 138, 187
Expanding power of steam . . . . .	158, 235
Expansive engine . . . . .	
. . . . .	27, 29, 33, 43, 174, 185, 203, 207
