978-1-108-07034-8 - Practical Essay on the Strength of Cast Iron and Other Metals:
Containing Practical Rules, Tables, and Examples, Founded on a Series of Experiments,
with an Extensive Table of the Properties of Materials: Volume 1: Practical Essay on
the Strength of Cast Iron and Other Metals

Thomas Tredgold Edited by Eaton Hodgkinson

CONTENTS OF PART I.

SECTION I.

	PAGE
INTRODUCTION. Art. 1-7	1
Remarks on Using the Tables	6
Table I. Of the size of Square Beams, of different lengths, to sustain from 1 cwt. to 500 tons. Art. 5.	12
Table II. Showing the Loads which Beams of various sizes will support without producing permanent set. Art. 6	20
Table III. To show the Loads which Pillars and Columns of different diameters will support with safety. Art. 7	26

SECTION II.

Explanation of the Tables, with Examples of their Use.	
Art. 8-23	27
————— first Table	<i>ib.</i>
————— second Table	28
————— third Table	29
Examples of the Use of the first and second Tables	30
————— third Table	43

SECTION III.

Of the Forms of greatest Strength for Beams to resist	
Cross Strains. Art. 24-35	46

xxvi

CONTENTS OF PART I.

SECTION IV.

	PAGE
Of the Strongest Form of Section for Beams to resist Cross Strains. Art. 36-45	53
Of the Strongest Form of Section for revolving Shafts. Art. 46-47	60

SECTION V.

An Account of Experiments on Cast Iron. Art. 48-87 .	63
Experiments on the Resistance to Flexure. Art. 49-70 .	<i>ib.</i>
————— Iron of different qualities. Art. 71-77 .	82
————— Resistance to Tension. Art. 78-80 . .	93
————— Resistance to Compression. Art. 81-84 .	95
————— Resistance to Torsion. Art. 85 . . .	99
————— the Effect of Impulsive Force. Art. 86 .	102
To distinguish the Properties of Cast Iron by the Fracture. Art. 87	103

SECTION VI.

Experiments on Malleable Iron and other Metals. Art. 88-97	105
Experiments on the Resistance of Malleable Iron to Flexure. Art. 88-91	<i>ib.</i>
Experiments on the Resistance of Malleable Iron to Ten- sion. Art. 92	112
Experiments on the Resistance of Malleable Iron to Com- pression. Art. 93	113
Experiments on the Resistance of Malleable Iron to Torsion. Art. 94	115
Experiments on Various Metals. Art. 95-97	117
————— Steel. Art. 95	<i>ib.</i>
————— Gun-metal. Art. 96	118
————— Brass. Art. 97	120

CONTENTS OF PART I.

xxvii

SECTION VII.

	PAGE
On the Strength and Deflexion of Cast Iron, &c. Art. 98-247	122
Practical Rules and Examples for Resistance to Cross Strains. Art. 142-210	154
Table of Cast Iron Joists for Fire-proof Floors, &c.	192
Practical Rules and Examples for Deflexion by Cross Strains. Art. 211-247	199

SECTION VIII.

Of Lateral Stiffness, with Rules and Examples applied to Engine Beams, Cranks, Wheels, Shafts, &c. Art. 248- 261	210
--	-----

SECTION IX.

Resistance to Torsion. Art. 262-274	223
Practical Rules and Examples of Stiffness to resist Torsion. Art. 273-275	231

SECTION X.

Of the Strength of Columns, Pillars, or other Supports compressed, or extended in the direction of their Length. Art. 276-293	235
To find the Area of Short Blocks to resist Pressure. Art. 281-282	241
Of the Strength of long Pillars or Columns. Art. 286-292	244
Of the Strength of Bars and Rods to resist Tension. Art. 293	249

SECTION XI.

Of the Resistance to Impulsive Force. Art. 294-312	254
Practical Rules for the Resistance to Impulsive Force. Art. 313-351	265

CONTENTS OF PART I.

	PAGE
An ALPHABETICAL TABLE OF DATA, for applying the Rules to other Materials, with other Numbers useful in various Calculations	279
On the CHEMICAL ACTION of certain Substances on Cast Iron	294
Explanation of the Plates	297
List of Authors referred to in the Table of Data, &c. . . .	302
Plates I. II. III. IV.	<i>to face</i> 296

*All the quantities, proportions, &c., are stated in English weights
and measures, the pound being the avoirdupois pound, except the
contrary be stated.*
