CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Latin American Studies

This series focuses on colonial Latin America and the Caribbean. It includes historical and statistical reference works from the eighteenth and nineteenth centuries, reports describing scientific, archaeological and ethnological expeditions, and editions of accounts from the earliest period of European settlement.

Journal of a Residence and Tour in the Republic of Mexico in the Year 1826

The British naval officer George Francis Lyon (1795–1832) survived extremes of African heat and Arctic cold during his colourful career. Remembered chiefly for the engaging journals he kept, and for his watercolours of the Arctic, he was fascinated by the indigenous peoples of the lands he explored, notably being tattooed by Inuit and eating raw caribou and seal meat with them. In 1826 he sailed to Mexico, then recovering from its war of independence, to serve as a commissioner for an English mining company. His vivid and often entertaining two-volume account of his experiences was published in 1828. In Volume 2, Lyon encounters notorious bandits outside Guadalajara, ponders the potential navigation of rivers for commercial shipping, and writes of a visit to the Guadalajara theatre: 'had it not been for the universal smoking, and the silence and good manners of the audience, I might have almost fancied myself in England'.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
