## CAMBRIDGE LIBRARY COLLECTION

*Books of enduring scholarly value*

### Literary Studies

This series provides a high-quality selection of early printings of literary works, textual editions, anthologies and literary criticism which are of lasting scholarly interest. Ranging from Old English to Shakespeare to early twentieth-century work from around the world, these books offer a valuable resource for scholars in reception history, textual editing, and literary studies.

### Literary Anecdotes of the Eighteenth Century

In this nine-volume work, published between 1812 and 1815, the author and publisher John Nichols (1745–1826) provides biographical notes on publishers, writers and artists of the eighteenth century, and also gives ‘an incidental view of the progress and advancement of literature in this kingdom during the last century’. (A shorter version had been published in 1782.) His subjects range from the publisher William Bowyer to Henry Fielding and Horace Walpole, and also include histories of individual publishing houses and of genres such as lexicography. The work remains a useful source of biographical material on authors and publishers at a period when many of the literary genres we take for granted, such as the novel, the autobiography and the analytical history, were first being developed. Volume 6 includes essays on the Gentlemen’s Society at Spalding and the Society of Antiquaries, as well as many individual memoirs.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
