

CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Education

This series focuses on educational theory and practice, particularly in the context of eighteenth- and nineteenth-century Europe and its colonies, and America. During this period, the questions of who should be educated, to what age, to what standard and using what curriculum, were widely debated. The reform of schools and universities, the drive towards improving women's education, and the movement for free (or at least low-cost) schools for the poor were all major concerns both for governments and for society at large. The books selected for reissue in this series discuss key issues of their time, including the 'appropriate' levels of instruction for the children of the working classes, the emergence of adult education movements, and proposals for the higher education of women. They also cover topics that still resonate today, such as the nature of education, the role of universities in the diffusion of knowledge, and the involvement of religious groups in establishing and running schools.

Reciprocal Duties of Parents and Children

Displaying her intellectual and literary abilities from a young age, 'Mrs Taylor of Ongar' (1757–1830) enjoyed writing all her life. She had eleven children, of whom six (four of them writers) survived to adulthood. Her published works began with advice books for her own daughters, produced when increasing deafness made ordinary conversation difficult for her. This book, published in 1818, follows her earlier works for young women with a guide to conduct and 'reciprocal duties' within the family. Stern warnings and cautionary tales are given to show the importance of duty to and respect for parents by children, but the parental duties of care in rearing and especially in education are emphasised. Early discipline, lovingly applied, is seen as the key to successful parenting, and its absence is deemed disastrous. Like Ann Taylor's *Practical Hints to Young Females* (also reissued in this series), the book offers fascinating insights into the middle-class ideal of domestic happiness.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
