*The numbers refer to the pages of the English translation, from which reference can be readily made to the Italian text by comparing the dates of the several Despatches.*

*The Italian forms of many names differ greatly from the ordinary French and English spelling. The identification in some cases is of no difficulty; where less obvious, the Italian form is here printed in italic type after the French or English. Every effort has been made to identify these names correctly, but of some few the Editor is still doubtful.*
