CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Latin American Studies

This series focuses on colonial Latin America and the Caribbean.

It includes historical and statistical reference works from the eighteenth and nineteenth centuries, reports describing scientific, archaeological and ethnological expeditions, and editions of accounts from the earliest period of European settlement.

Cuzco and Lima

Clements R. Markham (1830–1916) began his career in the Royal Navy, sailing to South America, learning Spanish, and participating in the Arctic search for Sir John Franklin. In 1852, determined to succeed as an explorer and geographer, he travelled to Peru and visited the site of the ancient city of Cuzco, previously little known in Europe. Published in 1856, this is Markham's lively account of his travels. In his description of arriving in Panama we see a picture of the mid-nineteenth-century eagerness to explore (or exploit) Latin America. Markham's stay in Cuzco allowed him ample time to study the ruins and research the lost Inca civilisation, and also gave him his introduction to the properties of the cinchona plant, a source of quinine, which he later returned to collect and introduce to India, as described in his 1862 *Travels in Peru and India* (also reissued in the Cambridge Library Collection).

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
