CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

British and Irish History, Seventeenth and Eighteenth Centuries

The books in this series focus on the British Isles in the early modern period, as interpreted by eighteenth- and nineteenth-century historians, and show the shift to 'scientific' historiography. Several of them are devoted exclusively to the history of Ireland, while others cover topics including economic history, foreign and colonial policy, agriculture and the industrial revolution. There are also works in political thought and social theory, which address subjects such as human rights, the role of women, and criminal justice.

The Diary of John Evelyn

The Stuart writer and gardener John Evelyn (1620–1706), whose two-volume *Sylva* is also reissued in this series, kept a diary from the age of eleven, and in the 1680s began to compile this memoir from his records. It was first published in 1818 in an edition by the antiquarian William Bray; this three-volume version of 1906 was edited by Austin Dobson (1840–1921), the author and poet who also wrote the volume on Henry Fielding in the 'English Men of Letters' series, among many other literary biographies. In an extensive preface, Dobson explains his reasons for revisiting a work which had already received much editorial attention, and his introduction gives a short biography of its author. Volume 3 covers the period from 1677, including the death of Charles II and the Glorious Revolution, and ending with notes made a few weeks before Evelyn's death in 1706.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
