## CAMBRIDGE LIBRARY COLLECTION

*Books of enduring scholarly value*

### **Art and Architecture**

From the middle of the eighteenth century, with the growth of travel at home and abroad and the increase in leisure for the wealthier classes, the arts became the subject of more widespread appreciation and discussion. The rapid expansion of book and periodical publishing in this area both reflected and encouraged interest in art and art history among the wider reading public. This series throws light on the development of visual culture and aesthetics. It covers topics from the Grand Tour to the great exhibitions of the nineteenth century, and includes art criticism and biography.

### **Treasures of Art in Great Britain**

This four-volume work by Gustav Friedrich Waagen (1794–1868), edited and translated by Lady Eastlake (1809–93), was published between 1854 and 1857. As Waagen explains in his preface, he had previously published an account of his experiences on his first visit to Britain in 1835, but this new and longer work was addressed primarily to a British audience. It also differs in that the earlier work was more of a general travelogue, whereas these volumes, after an introductory essay, provide a more detailed catalogue – albeit in epistolary form – of works of art in public and private collections. Waagen was crucial to the adoption in Britain of the new approach to art history pioneered by German scholars, and his work is still consulted on matters of provenance and quality. Volume 3 describes collections in stately homes, and museums and public galleries, outside London.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
