

CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

British and Irish History, Nineteenth Century

This series comprises contemporary or near-contemporary accounts of the political, economic and social history of the British Isles during the nineteenth century. It includes material on international diplomacy and trade, labour relations and the women's movement, developments in education and social welfare, religious emancipation, the justice system, and special events including the Great Exhibition of 1851.

Heathen England, and What To Do for It

This book, published in 1877, describes both the 'utterly Godless condition of the vast majority of the English nation' and the activities of William Booth (not yet famous as the founder of the Salvation Army, first named in 1878) at the Whitechapel Christian Mission, where he had been working since 1865. It is not clear whether Booth (1829–1912) actually wrote this book: the preface is signed by 'Geo. R.', and Booth is referred to in the third person, but it is conventionally ascribed to him and certainly echoes his own beliefs. (Booth's more famous 1890 work, *In Darkest England and the Way Out* (also reissued in this series) was ghostwritten by journalist W.T. Stead.) Using anecdotes from Whitechapel, the book claims that the British urban working classes are in more urgent need of Christian help and education, on the model provided by Booth, than any so-called pagan society overseas.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.

HEATHEN ENGLAND

In days when almost everything is disputed, when every-thing supernatural is repudiated as utterly absurd and impossible by so many, amongst the most educated as well as amongst the most ignorant, it behoves all who can produce positive evidence of the existence and activity of miracle-working power to come forward, and to tell the truth and the whole truth.

I do not pretend to have seen paralytics, or blind men suddenly restored to the use of their physical faculties in the manner that pilgrims to Lourdes and other Pophish shins are said to have been. But I do place on record a story of cures far more complete and startling, wrought not in some far-off "corner," but in the presence of hundreds and thousands of spectators—amidst a blaze of gas-light, if not of daylight. For years I have been mixing daily with such scenes, and with people who have instantaneously received a power far exceeding all their bodily forces combined.

HEATHEN ENGLAND.

Most of this book was written a year ago, so that I have had ample opportunity to reconsider my assertions, What I say I know, and if, as I maintain, the statements of this book defy contradiction, they demand the immediate and closest attention, not merely of every man of science, but of every true patriot.

Read every word of it, and then, if you are inclined to dispute the truth of anything I have written, give me the opportunity to satisfy you, and to show you greater marvels still.
