## CHAPTER I. CINERARY URNS

PAGE

|  |      |
|--|------|
| Areas defined. Type 1, Overhanging-rim type. <i>Area I</i> , type 1—Multiple Interments—Interments without or with Urns now lost . . . . . | 7-14 |
|--|------|

## CHAPTER II

|  |       |
|--|-------|
| <i>Area II</i> , type 1. <i>Area III</i> , type 1. <i>Area IV</i> , type 1. <i>Area V</i> , type 1. Distribution of type 1. Ornamentation of type 1. Time-relation between Food Vessels and Urns of type 1 . . . . . | 15-23 |
|--|-------|

## CHAPTER III

## TYPE 2, SMALL CINERARY OR PYGMY VESSELS

|  |       |
|--|-------|
| Their varieties— <i>Area I</i> : Expanded or Pedestal Cups—Grape, Nodulated, or Mammillated Cups—Cups with perforated walls—Biconical with everted lip—Straight-sided Cups—Biconical Cups—Miscellaneous forms—Cups of shale and amber. <i>Area II</i> : Cups with perforated walls, &c. <i>Area III</i> : Pygmy Cups. <i>Area IV</i> (North Britain): Pygmy Cups. <i>Area V</i> (Hibernia): Pygmy Cups . . . . . | 24-34 |
|--|-------|

## CHAPTER IV. AGE OF PYGMY VESSELS

|  |       |
|--|-------|
| General results. Ornamentation of type 2. Distribution of type 2 . . . . . | 35-37 |
|--|-------|

## CHAPTER V. TYPE 3, SOUTHERN GROUPS 1, 2, 3

|  |       |
|--|-------|
| Group 1 (figs. 356-70)—Group 2 (figs. 371-7)—Group 3 (figs. 378-88). Type 4, Deverel-Rimbury groups 1, 2—Group 1 (figs. 389-408)—Group 2 (figs. 409-24). Rimbury Barrow group (figs. 425-56 <i>k</i> ). Miscellaneous urns . . . . . | 38-46 |
|--|-------|

## BRONZE AGE POTTERY

## CHAPTER VI

## RELATIVE AGE OF SOUTHERN TYPES 3, 4

PAGE

|   |       |
|---|-------|
| Type 3, Group 1. Group 2. Group 3. Type 4, Deverel group 1. Origin of types 3, 4—Comparison between British and Pyrenean examples—the Lausitz group . . . . . | 47-50 |
|---|-------|

## CHAPTER VII

|  |       |
|--|-------|
| <i>Area II</i> (from Thames to Humber): Southern types—Enlarged food-vessel types—Type 5, the Cordon or hooped type. <i>Area III</i> (from Humber to Tweed): Enlarged food vessels—Type 6, Encrusted type. <i>Area IV</i> (North Britain): Type 5, Cordon or hooped type—Type 7, Enlarged food vessels—Type 6, Encrusted type—Biconical and other forms—Broch pottery. <i>Area IV</i> , Cinerary Interments with objects without or with lost urns. <i>Area V</i> (Hibernia): Type 5, Cordon type—Bucket-shaped urns—Type 6, Encrusted type—Enlarged food vessels. | 51-59 |
|--|-------|

## CHAPTER VIII

|  |       |
|--|-------|
| <i>Area I</i> (south of the Thames): Objects found with urns of types 1-4, and with cremated interments without urns: Stone hammers and axe-hammers—Arrowheads—Bone tweezers—Shale cups—Amber cup—Jet—Gold boxes, pectorals, pendants—Bronze pins, flat axe, blades. Finds with uncremated and cremated interments contrasted. Finds of Bronze Age I contrasted with Periods 2-5. Vitreous paste, porcelain—its origin and date. Amber. <i>Areas II, III</i> (from Thames to Tweed): Stone axe-hammers—Arrowheads, shale, amber. Bronze: dimensions of blades—Glass—Funeral furniture of <i>Area I</i> , Bronze Age II-V, compared with that of <i>Areas II, III</i> . Comparison of Grave Furniture of Period 1 with Periods 2-5 in these two Areas. <i>Areas IV, V</i> (North Britain and Hibernia): Stone hammers—Bronze, dimensions of blades—Glass beads—Gold—Absence of large pieces of bronze in graves explained . . . . . | 60-74 |
| Tables I-VII . . . . .   | 75-81 |

## CHAPTER IX. ETHNOGRAPHICAL

|  |       |
|--|-------|
| Sepulchral customs—form of barrows. Sepulchral customs for types 1, 2—for other types. Bell-shaped barrows—Disc-shaped barrows perhaps reserved for women. Types other than 1, 2. Flat cemeteries—with types 1, 2—with other types. Funeral feasts—cereals. Position of Women—mammillated and pedestal cups perhaps reserved for women. Double interments—Habitations—Entrenchments, camps of nearly rectangular form. Animal remains. The Inhabitants . . . . . | 82-91 |
|--|-------|

## CHAPTER X. STONEHENGE

|  |       |
|--|-------|
| Plan showing barrows containing beakers. Analogies between its structure and that of sepulchral monuments—the purpose of the triliths and continuous architrave. At Stonehenge was celebrated perhaps the annual death of the divinity of Nature—midwinter ceremonies to promote fertility. Cruithne, the ancestor of the Picts, a female name . . . . . | 92-97 |
|--|-------|

## CONTENTS OF VOLUME II

5

## CHAPTER XI

## WHO WERE THE BRACHYCEPHALIC INVADERS?

PAGE

|   |        |
|---|--------|
| They came from north of Helvetia, speaking an Aryan language. Pictish settlements in Hibernia—importance of the word for <i>5</i> , <i>coic</i> —physical appearance of the Ulidians. Invaders were blonde and brown-haired . . . . . | 98–101 |
|---|--------|

## CHAPTER XII. LIMITS OF THE BRONZE AGE

|   |         |
|---|---------|
| Evidence of South Lodge Camp—Bronze Age lasted there till <i>c.</i> 200 B.C. Who were the villagers?—their skull-type and stature—compared with skeletons from ‘Danes’ graves. Came perhaps from Stade or Holland . . . . . | 102–105 |
|---|---------|

## CHAPTER XIII

## RELATIVE CHRONOLOGY OF POTTERY OF BRONZE AGE I–V

|   |         |
|---|---------|
| <i>Table VIII.</i> The absolute chronology of the Bronze Age—Recapitulation of events that happened in Great Britain and Ireland from 2000 to 400 B.C.—Hibernia . . . . . | 106–114 |
| List of cinerary urns with references—list of Continental urns—illustrations of objects . . . . .   | 115–124 |
