*Books of enduring scholarly value*

### **Egyptology**

The large-scale scientific investigation of Egyptian antiquities by Western scholars began as an unintended consequence of Napoleon's invasion of Egypt during which, in 1799, the Rosetta Stone was discovered. The military expedition was accompanied by French scholars, whose reports prompted a wave of enthusiasm that swept across Europe and North America resulting in the Egyptian Revival style in art and architecture. Increasing numbers of tourists visited Egypt, eager to see the marvels being revealed by archaeological excavation. Writers and booksellers responded to this growing interest with publications ranging from technical site reports to tourist guidebooks and from children's histories to theories identifying the pyramids as repositories of esoteric knowledge. This series reissues a wide selection of such books. They reveal the gradual change from the 'tomb-robbing' approach of early excavators to the highly organised and systematic approach of Flinders Petrie, the 'father of Egyptology', and include early accounts of the decipherment of the hieroglyphic script.

### **The History of Egypt under the Ptolemies**

This 1838 work by Samuel Sharpe (1799–1881) is the second of two volumes on the history of ancient Egypt: the first, dealing with the earlier period, is also reissued in this series. From a banking family, Sharpe was fascinated by Young's and Champollion's work in deciphering the hieroglyphs. He taught himself Coptic, and compiled his own hieroglyphic vocabulary lists. His facility for decipherment was assisted by a natural gift for solving cryptograms, but his inferences sometimes led him into error. This book, in which Sharpe follows his earlier technique of using inscriptions as well as historical works as sources, begins with a survey of the history of Egypt up to the time of Alexander the Great: the interested reader is referred to Sharpe's earlier volume for more details. He then surveys the Ptolemaic era by reigns, ending with the battle of Actium and the conquest of Egypt by Augustus.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.

## TO THE READER.

THE Author has given neither the arguments nor the whole of the authorities on which the sketch of the earlier history in the Introduction rests, as it would have had too much of the dryness of an antiquarian enquiry, and as he has already published them in his *Early History of Egypt*. In the rest of the book he has in every case pointed out in the margin the sources from which he has drawn his information.

Canonbury, 12th November, 1838.

*Works published by the same Author.*

The **EARLY HISTORY** of EGYPT, from the Old Testament, Herodotus, Manetho, and the Hieroglyphical Inscriptions.

**EGYPTIAN INSCRIPTIONS**, from the British Museum and other sources. Sixty Plates in folio.

Rudiments of a **VOCABULARY** of EGYPTIAN HIEROGLYPHICS.
