

Index

- abdominal wall incisions 28–31, 103–4
 closure 11, 31–32, 109
 acidosis, fetal 66t. 2.4, 68
 anal sphincter damage 47, 49
 anatomy 35–38, 111, 115
 abdominal wall 26–27
 anal 36
 muscular 27, 35–37
 nervous 27, 37
 pelvic floor 35–36
 perineum 36–37
 vascular 26–27, 108
 antihypertensive agents 76
 antiseptic hand gels 8
 artery forceps 16–17
- bimanual examination 80–81
 bipolar diathermy 88–89
 blood transfusions 61–62
 bradycardia, fetal 50, 64t. 2.3
- caesarean sections 29, 68–71
 capacitative coupling 94
 cardiotocography (CTG) 50, 63, 73–74
 cervical smears 81–82
 coagulation current 88, 90, 92
 coagulopathy 61–62
 consent 46, 52, 69–71, 97
 continuous sutures 23, 25
 Cuscoe speculum 78–80
 cutting current 87, 90
 cutting needles 12
- diathermy 86–98
 dissecting forceps 16
 documentation 56, 70–72, 81
 drain insertion 31
- eclampsia 74–76
 electrosurgery 86–98
 epigastric vessels 108, 111, 114
 episiotomy 11, 47–49
 examinations
 bimanual 80–81
 cervical 78–80
 gynaecological 77–81
 pelvic 77–81
 speculum 78–81, 99
 uterine 81
 vaginal 78–81
 vulval 78
- factor VIIa, recombinant 62
 fetal head 38–39
 fetal heart rate monitoring 50, 63, 73–74
 fetal scalp blood sampling 67–68
 fluid management
 eclampsia 76
 hysteroscopy 99–100
 forceps delivery 52–53
 forceps (surgical) 16–17
- gloves 9
 gowns 9
- haemorrhage 34, 47, 57–62
 haemostasis
 artery forceps 16–17
 electrosurgery 88, 90, 92
 management of PPH 59–62
 after miscarriage 86
 suturing 32–33
 hand washing 7–9
 hydralazine 76
 hypertension (eclampsia) 76
 hysteroscopy 97–101
- instrument tie knots 18
 instrumental delivery 41–46, 52–53
 instruments
 speculums 78–81, 99
 surgical 6, 13–17
 insufflators/insufflation 101–2, 105,
 109–10, 112–13
 interrupted sutures 24–25
 intrauterine contraceptive devices
 (IUCDs) 83–84
 ischiorectal fossae 37
- knot tying 17–22
- labetalol 76
 laparoscopy
 closed entry 103–7, 109–15
 electrosurgery 93–96, 98
 equipment 97–98, 101–3, 109–15
 incisions 29, 103–4, 107–9
 open entry 108–7
 patient position 97–98, 102
 port removal 108
 preoperative procedures 97, 102
 secondary ports 108
 locked sutures 23, 25
- magnesium sulphate 75–76
 manual removal of placenta 46–47,
 60–61
 mattress sutures 25
 midline incisions 28
 miscarriage 84–86
 monopolar diathermy 88, 92
- needle holders 17
 needles 11–13, 23
see also Veress needles
- operating tables 7, 97
 OSATS 33
- Palmer's point entry 29, 108
 Palmer's test 105, 109, 112–13
 patient positioning 7, 78, 79f. 3.2
 laparoscopy 97–98, 102
 pelvic floor anatomy 35–36
 perineal body 37
 perineum 36–37
 Pfannenstiel incisions 11, 29
 postpartum haemorrhage (PPH) 47,
 57–62
- pre-eclampsia 73
see also eclampsia
 protective clothing 7, 9
 pudendal nerve 37
 block 51–52
- rectus sheath 27
 reef knots (square knots) 18
 resuscitation (ABC) 74–75
 round-bodied needles 12
- safety considerations
 electrosurgery 93, 96
 in theatre 7
 scalpels 7, 13
 scissors 14–16
 scrub nurses 6
 seizures (eclampsia) 75–76
 sexually transmitted infections 82
 sharps, handling 7
 shoulder dystocia 54–57
 Sims' speculum 81, 99
 speculums 78–81, 99
 square knots 18
 subcuticular sutures 26
 suprapubic transverse incisions 11, 29
 surgeon's knots 18
 surgery
 basic skills 5–33
 caesarean sections 29, 68–71
 surgical management of miscarriage 85–86
 sutures/suturing
 episiotomy repair 11, 49
 suture materials 9–11
 techniques 23–26, 31–32
see also knot tying; needles
- thrombin 61
 tying at depth 22
- urogenital diaphragm 36
 uterotonic agents 47, 59
 uterus
 evacuation 84–86
 hysteroscopy 97–101
- vaginal delivery
 episiotomy 11, 47–49
 fetal monitoring 50, 63–68, 73–74
 forceps 52–53
 manual removal of placenta 46–47,
 60–61
 maternal care 38
 normal 39
 PPH 47, 57–62
 pudendal block 51–52
 shoulder dystocia 54–57
 Ventouse 41–46
 vaginal swabs 82
 Ventouse delivery 41–46
 Veress needles 102–3, 105,
 109, 112–13
 video cameras (endoscopic) 98, 102–3,
 110–11, 113–14
