

Index

- Adjacency matrix, 127, 128
- Agent-based computational economics, 7, 10, 11, 15, 21, 27–29
- Agent-based models, xviii, 6–8, 76, 118, 122–126, 164, 169–171, 223
- Behavioral economics, 55, 84
- Bounded rationality, 56, 77, 83–85
- Calibration, 164, 169, 174, 176, 177, 180, 184, 192
 - indirect, 178–180
- Cellular automata, 114
- Cognitive psychology, 86
- Complex systems, xviii, 3, 13, 21, 22
- Continuous simulation, 34
- Discrete event simulations, 34–36
- DSGE models, 1–5, 15, 69
- Dynamic microsimulation, 24
- Ergodicity, 146, 147, 150, 151, 162, 186, 187, 189
- Error-learning hypothesis, 56
- Estimation, 164, 169, 174, 177, 184, 185, 189, 190, 192, 195, 197–200, 202, 203, 211, 212
 - Bayesian, 210
- Evolutionary algorithms, 97, 103, 104
- Expectations, 4, 43, 51, 53, 57–59, 71
 - adaptive, 16, 17, 56, 59, 76, 144
 - heterogenous, 71, 73, 76
 - rational, 15, 17, 44, 52, 55, 63, 71, 96, 144
- Factor mapping, 153
- Factor prioritization, 153
- Financial accelerator, 1–3, 123
- Financial frictions, 2–4
- Financial instability, 1, 8
- Fitness networks, 138
- Framing effect, 86
- Global financial crisis, 1, 2
- Heterogeneity, 3–5, 18
- Hyperbolic discounting, 88
- Importance sampling, 215
- Interaction
 - direct, 113
 - indirect, 113
- IS equation, 57–59, 68
- Kernel density estimation, 211
- Lattice, 111–113, 136, 137
- Learning, 16, 71, 93–95
 - fitness, 97
 - reinforcement, 97–99
 - social, 95, 105–108
 - statistical, 95, 96
- LM equation, 57, 59
- Markov chain, 36, 215
- Markov chain Monte Carlo, 215
- Mental accounting, 88, 89
- Metamodeling, 154
- Monte Carlo analysis, 40–42
- Moore neighborhood, 113

Neoclassical approach, 1, 4, 6, 11, 17, 19, 28, 29, 32, 55, 57, 68, 83, 86, 88–90, 108, 167, 169	Segregation model, 29, 30
Network theory, 125, 126, 129, 142	Sensitivity analysis, 144, 151
Phillips curve, 57, 58, 69	Sequential Monte Carlo methods, 216
Poisson model, 134	Simulated minimum distance, 190
Procurement processes, 118	Stationarity, 145, 147, 151, 162, 187, 194
Random graph, 111	Statistical equilibrium, 8, 144, 145
Recursive systems, 36	System dynamics, 34
Reinforcement models, 97	Validation
Rejection sampling, 214	empirical, 163–165, 172, 173, 181
	input, 164, 169, 170
	output, 164, 165, 173, 176
	Von Neumann neighborhood, 112
