### **Introduction** 1

<b>1</b>	<b>Energy in International Law</b>	<b>10</b>
	I The Internationalisation of Energy Transactions	10
	II Energy as a Legal Object	14
	2.1 Overview	14
	2.2 Energy as a Resource	15
	2.3 Energy as a Product	17
	2.4 Energy as a Technology	17
	2.5 Energy as an Activity	18
	2.6 Energy as a Legal Object: Summary	20
	III The Purposes of Energy Governance	21
	3.1 Overview	21
	3.2 Main Purposes of Energy Governance	21
	3.3 The Primacy of Availability and Security	23
	3.4 The Rise of Access and Sustainability	25
	3.5 Competition among Purposes	28
	IV The Structure of International Energy Transactions	29
	4.1 Overview	29
	4.2 ‘Transactions’ and ‘Externalities’	29
	4.3 The Rules Governing International Energy ‘Transactions’ and their ‘Externalities’	32
	V Three Approaches to the Regulation of International Energy Transactions	34
	5.1 Overview	34
	5.2 Foundational Approach	36
	5.3 Ad Hoc Approach	37
	5.4 Centralised Approach	39

<b>2 Foundational Approach: International Energy Transactions</b>	<b>42</b>
I Overview	42
II Legal Entitlements over Energy as a Legal Object	43
2.1 Rules Conferring Entitlements	43
2.1.1 Introductory Observations	43
2.1.2 States	45
2.1.3 Peoples	48
2.1.4 Other Collective Subjects	50
2.1.5 Individuals	53
2.1.6 International Organisations	55
2.2 Rules Allocating Entitlements	56
2.2.1 Introductory Observations	56
2.2.2 Energy between Title and <i>Effectivités</i>	57
2.2.3 Energy and Maritime Delimitation	58
2.2.4 Principles Governing Competing Uses of Energy	60
2.2.5 Asymmetric Conditions	64
III Rules Enabling and Protecting International Energy Transactions	66
3.1 Analytical Distinctions	66
3.2 A Partial Synthesis: The Energy Charter Treaty	69
3.3 An Inchoate Global Framework for Energy Trade, Investment and Transit	73
3.3.1 Introductory Observations	73
3.3.2 Energy Trade under the WTO Agreements	74
3.3.2.1 From 'Whether' to 'How'	74
3.3.2.2 Extent of the Coverage	78
3.3.2.2.1 Export Measures	78
3.3.2.2.2 Energy Services	80
3.3.2.2.3 Network-Bound Transit	81
3.3.2.2.4 Membership and Commitments of Key Countries	82
3.3.2.3 Modalities of Application	83
3.3.2.3.1 Characterisation of Electricity	83
3.3.2.3.2 Business Practices of State Trading Enterprises	84
3.3.2.3.3 Operation of Substantive Standards	85
3.3.2.3.4 Differentiation	86
3.3.2.4 Differentiation	86
3.3.3 Investment Protection, Bilateralism and Misalignment	88
3.3.3.1 Foreign Investment and Trade Disciplines	88
3.3.3.2 Foreign Investment and Investment Disciplines	89
3.3.3.3 Misalignments	91

## CONTENTS

ix

3.3.4	The Transit Mosaic	93
3.3.4.1	Overarching Principles	93
3.3.4.2	Global Level	95
3.3.4.3	Regional Level: The ECT	98
3.3.4.4	Project/Route-Specific Level	100
3.3.4.5	Interactions between Levels	101
<b>3</b>	<b>Foundational Approach: Regulating Negative Externalities</b>	<b>104</b>
I	Overview	104
II	The Operation of Special Rules	105
2.1	Legal Proximity	105
2.2	Carve-outs	107
2.2.1	Taxation Carve-outs (Article 21 ECT)	107
2.2.2	Non-Precluded Measures (Article XI Argentina–US BIT)	108
2.2.3	Public Procurement Carve-out (Article III(8) (a) GATT)	109
2.2.4	National Security (Article XXI GATT)	110
2.3	Modulations of Primary Norms	111
2.3.1	Environmental Aspects (Article 19 ECT)	111
2.3.2	Revised Government Procurement Agreement	112
2.3.3	Interpretive Annexes (Annex 10-B(4)(b) US–Oman FTA)	113
2.3.4	Implicit Modulations	114
2.4	Exceptions	116
2.4.1	Overview	116
2.4.2	Article XX of the GATT	117
2.4.3	Export Measures and Article XX	118
2.4.4	Renewable Energy Support Schemes and Article XX	119
2.4.5	Technical Barriers to Trade and Article XX	121
2.4.6	Processes and Production Methods under Article XX	122
2.4.7	Energy Security and Article XX	123
2.5	Separate but Formally Linked Instruments	124
2.5.1	Overview	124
2.5.2	The PEEREA	124
III	‘General’ Rules Limiting Negative Externalities	126
3.1	Stages of Intervention	126
3.2	Cost Internalisation	127
3.2.1	The Polluter-Pays Principle	127
3.2.2	Pricing Mechanisms	128
3.3	Prevention of Harm	131
3.3.1	Overview	131
3.3.2	Principles of Customary International Environmental Law	132

3.3.3	Procedural Requirements	142
3.3.3.1	Impact Assessments	142
3.3.3.2	Procedural Human Rights	147
3.3.3.2.1	Procedural Environmental Rights	147
3.3.3.2.2	Procedural Dimensions of General Human Rights	149
3.3.3.2.3	Rights of Indigenous and Tribal Peoples	150
3.3.4	Substantive Requirements	151
3.3.4.1	Protection of the Marine Environment	151
3.3.4.1.1	General Duties	152
3.3.4.1.2	Sources of Pollution	153
3.3.4.1.3	Regional Seas Instruments	158
3.3.4.2	Regulation of Air Pollution	161
3.3.4.2.1	Annex VI of MARPOL	161
3.3.4.2.2	The LRTAP Convention Regime	162
3.3.4.3	Regulation of Climate Change	163
3.3.4.3.1	The UNFCCC	164
3.3.4.3.2	The Kyoto Protocol	164
3.3.4.3.3	The Paris Agreement	165
3.3.4.3.4	Domestic Climate Change Laws	166
3.3.4.4	Area-Based Management Techniques	168
3.3.4.4.1	The Antarctic Environment	168
3.3.4.4.2	The World Heritage Convention	169
3.3.4.5	Human Rights and Resulting Obligations for States and Operators	171
3.3.4.5.1	States as Duty-Bearers	172
3.3.4.5.2	Private Operators as Duty- Bearers	174
3.4	Response to Harmful Events	180
3.4.1	Overview	180
3.4.2	Instruments with a Global Scope	181
3.4.3	Instruments with a Regional Scope	182
3.5	Reparation of Harmful Consequences	183
3.5.1	Overview	183
3.5.2	State Responsibility	183
3.5.2.1	Consequences of 'Breach'	184
3.5.2.2	Operation in Judicial Practice	186
3.5.3	Civil Liability	188
3.5.3.1	Compensation of Oil Spills: Overview of the System	188
3.5.3.2	Scope of Application	189
3.5.3.3	Strict Liability and Channelling of Claims	191

## CONTENTS

xi

3.5.3.4	Insurance	192
3.5.3.5	Additional Compensation	192
3.5.3.6	Non-Discrimination	193
<b>4</b>	<b>Ad Hoc Approach: Joint Development of Hydrocarbons</b>	<b>194</b>
I	Overview	194
II	Ad Hoc Governance of Energy Deposits/Projects	195
2.1	Introduction	195
2.2	Normative Interactions	197
III	Joint Development of Hydrocarbons	200
3.1	Introduction	200
3.2	The Aborted Work of the International Law Commission	204
3.3	Structure and Content of JDAs	207
3.3.1	Types	207
3.3.2	Recurrent Issues	211
3.3.2.1	Contractual Forms	211
3.3.2.2	Pre-Existing Rights	213
3.3.2.3	Taxation, Costs and Revenues	215
3.3.2.4	Negative Externalities	217
3.3.2.5	Applicable Law and Dispute Settlement	220
3.3.2.6	JDAs and the Law of Treaties: Selected Issues	223
3.3.2.6.1	Nature of Agreements Embodying the JDA Regime	223
3.3.2.6.2	Implications for Third Parties	224
3.3.2.6.3	State Succession to Treaties	226
3.4	Overarching Principles Applicable to Straddling/Disputed Hydrocarbon Deposits	227
3.4.1	Preliminary Observations	227
3.4.2	Unilateral Exploitation and Mutual Restraint	228
3.4.3	Duty to Cooperate (Notification, Consultation and Information Exchange)	232
3.4.4	Prevention of Harm (No Harm and Prevention of Environmental Harm)	239
<b>5</b>	<b>Ad Hoc Approach: Hydroelectricity, Offshore Wind, Pipelines and Electricity Transmission Lines</b>	<b>243</b>
I	Overview	243
II	Hydroelectric Projects in International Watercourses	244
2.1	Ad Hoc Governance of Hydroelectric Projects	244
2.2	Structure and Content of the Agreements	247
2.2.1	Overview	247
2.2.2	Models of Cooperation	249
2.2.3	Sharing Formulae	251

2.2.4	Territorial Implications	252
2.2.5	Adverse Effects (Negative Externalities)	254
2.2.6	Dispute Settlement Mechanisms	256
2.3	Overarching Principles	256
2.3.1	Overview	256
2.3.2	Equitable and Reasonable Utilisation	257
2.3.3	No Harm	258
2.3.4	Duty to Cooperate	258
2.3.5	Duty to Protect and Preserve the Environment of the Watercourse	260
III	Offshore Wind Power	260
3.1	Ad Hoc Governance of Offshore Wind Projects	260
3.2	The Structure of Offshore Wind Projects	263
3.2.1	The North Seas Cooperation Initiative	263
3.2.2	'Conventional' and 'Hybrid' Offshore Wind Projects	264
3.3	Overarching Principles	266
3.3.1	Overview	266
3.3.2	The Principles Embodied in Article 56 of the UNCLOS	267
3.3.3	Application to Offshore Wind Projects	268
IV	Oil and Gas Pipelines	269
4.1	Ad Hoc Governance of Pipelines	269
4.2	Structure and Content of the Agreements	274
4.2.1	Focus of the Agreement: Relation-Based versus Project-Based Agreements	274
4.2.2	Nature of the Agreements: IGAs, HGAs and Private Agreements	274
4.2.3	Project Structure: 'Connected' versus 'Integrated' Pipelines	275
4.2.4	Basic Contents of Pipeline Agreements	276
4.3	Overarching Principles	277
4.3.1	Overview	277
4.3.2	Laying of Pipelines	277
4.3.3	Transit Principles	278
4.3.4	Interactions between Pipeline Agreements and Their Proximate Context: Human Rights and Environmental Protection	279
V	Electricity Transmission Lines	281
5.1	Ad Hoc Governance of Electricity Transmission Lines	281
5.2	Structure and Content of the Agreements	284
5.2.1	Overview	284
5.2.2	Intergovernmental Agreements on Electricity	285
5.2.3	Host Government Agreements on Electricity	286
5.2.4	Inter-Utility Agreements	286

## CONTENTS

xiii

5.2.5	Electricity Purchase and Transmission Agreements	287
5.2.6	Market Integration	288
5.3	Overarching Principles	289
<b>6</b>	<b>Centralised Approach: Nuclear Energy</b>	<b>291</b>
I	Overview	291
II	Centralised Governance of Energy Resources	292
2.1	Introduction	293
2.2	Normative Interactions	296
III	Centralised Governance of Nuclear Energy	298
3.1	Introduction	298
3.2	The Dual Use of Nuclear Energy Technology	299
3.3	The Structure and Content of the Regulation	303
3.3.1	Purposes	303
3.3.2	Nuclear Transfers and Safeguards	307
3.3.2.1	Materials and Technology Transfers and Proliferation Risks	307
3.3.2.2	Nuclear Cooperation Agreements (NCAs)	309
3.3.2.2.1	The IAEA as a Broker	309
3.3.2.2.2	Legal Structure of Nuclear Transfers	310
3.3.2.2.3	The US Practice: Section 123 agreements	311
3.3.2.2.4	The Practice of Other Major Suppliers	314
3.3.2.2.5	Regional Agreements	315
3.3.2.3	Safeguards	316
3.3.2.3.1	Overview	316
3.3.2.3.2	Undertaking to Enter into Safeguard Agreements	317
3.3.2.3.3	Structure and Contents of Safeguard Agreements	318
3.3.2.3.4	International Verification and Inspection System	320
3.3.2.4	Physical Protection of Nuclear Materials and Facilities	322
3.3.2.4.1	IEA Guidelines	322
3.3.2.4.2	Convention on the Physical Protection of Nuclear Material	322
3.3.3	Nuclear Power and Safety	324
3.3.3.1	Nature and Scope of the Instruments	324
3.3.3.2	Prevention: The 1994 Nuclear Safety Convention and 1997 Joint Convention	326
3.3.3.2.1	Overview	326
3.3.3.2.2	Radiological Protection	326

	3.3.3.2.3	Safety of Nuclear Installations and Materials	328
	3.3.3.2.4	Transport of Nuclear and Radioactive Materials	329
	3.3.3.2.5	Radioactive Waste and Spent Fuel Management	331
	3.3.3.3	Response: The 1986 Early Notification and Assistance Conventions	333
	3.3.3.4	Reparation: The IAEA and OECD Liability Systems	334
	3.3.3.4.1	Overview	334
	3.3.3.4.2	Scope of Application of the Systems	336
	3.3.3.4.3	Strict Liability of the Operator	338
	3.3.3.4.4	Financial Guarantee	339
	3.3.3.4.5	Tiered Compensation	340
	3.3.3.4.6	Non-Discrimination	341
	3.3.4	Environmental Protection	341
	3.3.4.1	Overview	341
	3.3.4.2	Prevention of Environmental Harm	342
	3.3.4.3	Response to Emergencies	343
	3.3.4.4	Reparation of Environmental Harm	344
<b>7</b>		<b>Centralised Approach: Producer/Consumer, Promotion and Regional Cooperation Organisations</b>	<b>346</b>
	I	Overview	346
	II	Producer/Consumer Organisations	347
	2.1	Introduction	347
	2.2	Proto-Centralisation in the International Governance of Oil	348
	2.2.1	The 1960 Organization of the Petroleum Exporting Countries (OPEC)	348
	2.2.1.1	Overview	348
	2.2.1.2	The Origins of the OPEC	349
	2.2.1.3	The OPEC and the Permanent Sovereignty Movement	350
	2.2.1.4	Structure and Powers	352
	2.2.1.5	Evolving Practice	353
	2.2.1.6	Selected Legal Questions	356
	2.2.2	The Consumer's Response: The International Energy Agency (IEA)	357
	2.2.2.1	Origins of the IEA	357
	2.2.2.2	IEA Oil Shortage Management Measures	359
	2.2.2.3	The Broader Normative Power of the IEA	359
	2.2.2.4	Evolving Practice	361

## CONTENTS

xv

2.2.3	Producer–Consumer Dialogue: The International Energy Forum (IEF)	362
2.2.3.1	Origins of the IEF	362
2.2.3.2	Structure and Powers	363
2.2.3.3	Evolving Practice	364
2.3	Proto-Institutionalisation in the Gas Sector: The Gas Exporter Countries Forum (GECF)	365
III	Promotion Organisations	367
3.1	A Complex Institutional Landscape	367
3.2	The International Renewable Energy Agency (IRENA)	371
3.2.1	Origins of the IRENA	371
3.2.2	Structure and Powers	372
3.2.3	Evolving Practice	374
IV	Regional Cooperation Organisations	375
4.1	Introduction	375
4.2	The EU System of Regional Energy Governance	377
4.2.1	Overview	377
4.2.2	Energy as a Shared Competence	379
4.2.3	Exercise of Normative Powers: The Energy ‘Packages’	381
4.2.4	Institutional Architecture of the EU Energy Union	384
4.2.4.1	General EU Bodies	384
4.2.4.2	Energy-Specific Bodies: ACER, ENTSO-E and ENTSO-G	385
4.2.4.3	Multi-Stakeholder Fora	387
4.3	The Latin American Energy Organization (OLADE)	387
4.3.1	Origins of the OLADE	387
4.3.2	Structure and Powers	388
4.3.3	The OLADE and the Latin American Energy Integration Context	389
4.4	ASEAN Energy Cooperation	391
4.4.1	Origins of ASEAN Energy Cooperation	391
4.4.2	Legal Framework	392
4.4.3	The Broader ASEAN Economic Integration Context	394
<b>8</b>	<b>International Law and the Energy Transformation</b>	<b>395</b>
I	Overview	395
II	Socio-Technical Transitions	395
III	The Energy Transformation	399
3.1	From Transition to Transformation	399
3.2	The Geopolitics of Stranded Fossil Fuel Assets	400
3.3	The Geopolitics of Critical Raw Materials	402
IV	International Law as a Battle Front	405
4.1	Introductory Observations	405

4.2	Hindering the Transition	406
4.2.1	Introduction	406
4.2.2	Fossil Fuel and Renewable Energy Subsidies under Trade Law	407
4.2.3	The Extension of the ETS Directive to New Sectors	409
4.2.4	Recouping Lost Value	411
4.3	Harnessing Existing Rules in Support of the Transition	414
4.3.1	Introduction	414
4.3.2	Competition within the Emerging Socio-Technical Regime	414
4.3.3	The ‘Stability’ Struggle: Investment Claims in the Renewable Energy Sector	420
4.3.4	Disputes Concerning Critical and Other Raw Materials	429
4.4	Limiting the Adverse Implications of the Transition	431
	<b>Conclusion</b>	<b>435</b>
	<i>Index</i>	440
